Hybridity in Life Writing Arnaud Schmitt, 2024-04-28 This book offers new perspectives on text image hybridity in the context of life writing Each chapter explores the very topical issue of how writers and artists combine two media in order to enhance the autobiographical narrative and experience of the reader It questions the position of images in relation to text both on the page and in terms of the power balance between media It also shows how hybridity operates beyond a semantic and cultural balance of power as the combination of text and images are able to produce content that would not have been possible separately Including a range of life writing and different visual media from paintings and photography to graphic memoirs and social media this edited collection investigates the point at which an image whether fixed or moving enters the autobiographical act and confronts the verbal form

Lines of Flight Antonio Calcagno, Jim Vernon, Steve G. Lofts, 2014-05-08 The writings of Gilles Deleuze and Felix Guattari offer the most enduring and controversial contributions to the theory and practice of art in post war Continental thought However these writings are both so wide ranging and so challenging that much of the synoptic work on Deleuze Guattarian aesthetics has taken the form of sympathetic exegesis rather than critical appraisal This rich and original collection of essays authored by both major Deleuzian scholars and practicing artists and curators offers an important critique of Deleuze and Guattari s legacy in relation to a multitude of art forms including painting cinema television music architecture literature drawing and installation art Inspired by the implications of Deleuze and Guattari s work on difference and multiplicity and with a focus on the intersection of theory and practice the book represents a major interdisciplinary contribution to Deleuze Guattarian aesthetics

Criticizing Photographs Terry Barrett, 2020-11-29 Emphasizing the understanding of images and their influences on how they affect our attitudes beliefs and actions this fully updated sixth edition offers consequential ways of looking at images from the perspectives of photographers critics theoreticians historians curators and editors It invites informed conversations about meanings and implications of images providing multiple and sometimes conflicting answers to questions such as What are photographs Should they be called art Are they ethical What are their implications for self society and the world From showing how critics verbalize what they see in images and how they persuade us to see similarly to dealing with what different photographs might mean the book posits that some interpretations are better than others and explains how to deliberate among competing interpretations It looks at how the worth of photographs is judged aesthetically and socially offering samples and practical considerations for both studio critiques for artists and professional criticism for public audiences This book is a clear and accessible guide for students of art history photography and criticism as well as anyone interested in carefully looking at and talking about photographs and their effects on the world in which we live
