virtually all web browsers but also because it has become widely used for back end and general purpose development as well. Although JavaScript is a big language you don't need to learn everything about it to get started just how to use it efficiently to solve real problems. In *Learn Enough JavaScript to Be Dangerous*, renowned instructor Michael Hartl teaches the specific concepts, skills, and approaches you need to be professionally productive. Even if you've never programmed before, Hartl helps you quickly build technical sophistication and master the lore you need to succeed. Treating JavaScript as a general purpose language right from the start, Hartl offers examples for creating dynamic effects in browsers and for writing scripts and modules using Node.js. Focused exercises help you internalize what matters without wasting time on details pros don't care about. Soon it'll be like you were born knowing this stuff and you'll be suddenly seriously dangerous. Learn enough about rapidly deploying a simple JavaScript app to the live Web. Working with strings and other native JavaScript objects. Applying functions and elegant, powerful functional programming techniques. Creating new objects with both properties and methods. Writing tests and improving code with test driven development (TDD). Developing and using self-contained, modular NPM software packages. Adding interactivity with event listeners, dynamic HTML forms, and DOM manipulation. Writing useful, nontrivial JavaScript shell scripts. Building an industrial grade interactive website with JavaScript from start to finish. Michael Hartl's *Learn Enough* series includes books and video courses that focus on the most important parts of each subject so you don't have to learn everything to get started; you just have to learn enough to be dangerous and solve technical problems yourself. Register your book for convenient access to downloads, updates, and/or corrections as they become available. See inside book for details.

JavaScript Crash Course Nick Morgan, 2024-03-05. A fast paced, thorough programming introduction that will have you writing your own software and web applications in no time. Like *Python Crash Course*, this hands-on guide is a must-have for anyone who wants to learn how to code from the ground up this time using the popular JavaScript programming language. *Learn JavaScript Fast*, *JavaScript Crash Course* is a fun-filled, fast-paced introduction to programming with JavaScript. Dive right in and you'll be writing code solving problems and building working web applications and games in no time. You'll start by learning fundamental programming concepts such as variables, arrays, objects, functions, conditionals, loops, classes, and more. Aided by engaging examples and hands-on exercises, you'll build on this foundation and combine JavaScript with HTML and CSS to create interactive web applications that you can run right away. Then you'll put your new skills into play with three substantial projects: a Pong style game with a virtual opponent, an app that generates electronic music, and a platform for visualizing data fetched from an API. Along the way, you'll learn how to update web pages in real time by manipulating the Document Object Model (DOM), trigger functions in response to events like key presses and mouse clicks, generate graphics and animations with JavaScript and HTML's Canvas element, visualize data with the D3.js library, and scalable vector graphics (SVG). Make electronic music with Tone.js and the Web Audio API. If you've been thinking about digging into programming, *JavaScript Crash Course* will get you writing real programs fast. Why wait any

McPeak,2007-05-23 JavaScript is a scripting language that enables you to enhance static web applications by providing dynamic personalized and interactive content This improves the experience of visitors to your site and makes it more likely that they will visit again You must have seen the flashy drop down menus moving text and changing content that are now widespread on web sites they are enabled through JavaScript Supported by all the major browsers JavaScript is the language of choice on the Web It can even be used outside web applications to automate administrative tasks for example This book aims to teach you all you need to know to start experimenting with JavaScript what it is how it works and what you can do with it Starting from the basic syntax you ll move on to learn how to create powerful web applications Don t worry if you ve never programmed before this book will teach you all you need to know step by step You ll find that JavaScript can be a great introduction to the world of programming with the knowledge and understanding that you ll gain from this book you ll be able to move on to learn newer and more advanced technologies in the world of computing In order to get the most out of this book you ll need to have an understanding of HTML and how to create a static web page You don t need to have any programming experience This book will also suit you if you have some programming experience already and would like to turn your hand to web programming You will know a fair amount about computing concepts but maybe not as much about web technologies Alternatively you may have a design background and know relatively little about the Web and computing concepts For you JavaScript will be a cheap and relatively easy introduction to the world of programming and web application development Whoever you are we hope that this book lives up to your expectations You ll begin by looking at exactly what JavaScript is and taking your first steps with the underlying language and syntax You ll learn all the fundamental programming concepts including data and data types and structuring your code to make decisions in your programs or to loop over the same piece of code many times Once you re comfortable with the basics you ll move on to one of the key ideas in JavaScript the object You ll learn how to take advantage of the objects that are native to the JavaScript language such as dates and strings and find out how these objects enable you to manage complex data and simplify your programs Next you ll see how you can use JavaScript to manipulate objects made available to you in the browser such as forms windows and other controls Using this knowledge you can start to create truly professional looking applications that enable you to interact with the user Long pieces of code are very hard to get right every time even for the experienced programmer and JavaScript code is no exception You look at common syntax and logical errors how you can spot them and how to use the Microsoft Script Debugger to aid you with this task Also you need to examine how to handle the errors that slip through the net and ensure that these do not detract from the experience of the end user of your application From here you ll move on to more advanced topics such as using cookies and jazzing up your web pages with dynamic HTML and XML Finally you ll be looking at a relatively new and exciting technology remote scripting This allows your JavaScript in a HTML page to communicate directly with a server and useful for say looking up information on a database sitting on your server If

you have the Google toolbar you'll have seen something like this in action already When you type a search word in the Google toolbar it comes up with suggestions which it gets
