During the practical exercises the reader is constantly guided by the respective operating procedures. The learning method has been developed so that even beginners may complete the course and understand all the most complex functions and programming methods. Periodical tests are offered in order to help the students and teachers assess progress achieved or to highlight the topics for review. This is a fifty-hour course. The total number of hours necessary for the understanding of the theoretical part and for carrying out the practical exercises will always be specified at the beginning of each chapter. The course is centered on a three-axis lathe X Z C with driven tools; then the concepts applied to the programming of the lathe will be used to program a three-axis vertical mill X Y Z. All the programs used during the explanations and the collection of the images contained in the book, which may be printed, viewed, or displayed during the course at home or in the classroom, may be downloaded from the website [cncwebschool.com](http://cncwebschool.com).
