Knowledge and Systems Engineering Van Nam Huynh, Thierry Denoex, Dang Hung Tran, Anh Cuong Le, Son Bao Pham, 2013-10-01 The field of Knowledge and Systems Engineering KSE has experienced rapid development and inspired many applications in the world of information technology during the last decade The KSE conference aims at providing an open international forum for presentation discussion and exchange of the latest advances and challenges in research of the field These proceedings contain papers presented at the Fifth International Conference on Knowledge and Systems Engineering KSE 2013 which was held in Hanoi Vietnam during 17 19 October 2013 Besides the main track of contributed papers which are compiled into the first volume the conference also featured several special sessions focusing on specific topics of interest as well as included one workshop of which the papers form the second volume of these proceedings The book gathers a total of 68 papers describing recent advances and development on various topics including knowledge discovery and data mining natural language processing expert systems intelligent decision making computational biology computational modeling optimization algorithms and industrial applications

Distributed Constraint Problem Solving and Reasoning in Multi-agent Systems Weixiong Zhang, Volker Sorge, 2004 Distributed and multi agent systems are becoming more and more the focus of attention in artificial intelligence research and have already found their way into many practical applications An important prerequisite for their success is an ability to flexibly adapt their behavior via intelligent cooperation Successful reasoning about and within a multiagent system is therefore paramount to achieve intelligent behavior Distributed Constraint Satisfaction Problems DCSPs and Distributed Constraint Optimization minimization Problems DCOPs are perhaps ubiquitous in distributed systems in dynamic environments Many important problems in distributed environments and systems such as action coordination task scheduling and resource allocation can be formulated and solved as DCSPs and DCOPs Therefore techniques for solving DCSPs and DCOPs as well as strategies for automated reasoning in distributed systems are indispensable tools in the research areas of distributed and multi agent systems They also provide promising frameworks to deal with the increasingly diverse range of distributed real world problems emerging from the fast evolution of communication technologies The volume is divided in two parts One part contains papers on distributed constraint problems in multi agent systems The other part presents papers on Agents and Automated Reasoning
