Human Emotions:

Human Emotions Linda Bozzo, 2019-01-25 Emotions are powerful feelings that we don't always understand. Learn how and why humans experience emotions. This title supports NGSS From Molecules to Organisms Structures and Processes.

Human Emotions Carrie Smith, 2011 Find out about human emotions what causes them and the body parts that are associated with different emotions. *Human Emotions* Jonathan H. Turner, 2007 This major theoretical work takes existing work on the emotions in significantly new directions. It gives a comprehensive account of emotions beginning with general sociological principles moving over important theory construction of social formation and applying this to a detailed and unified grand theory of human emotions. Presenting a unified view of the emotions in the social universe the book explores the relationships between emotions social structure and culture. Turner hypothesizes how social structure and culture affect emotional arousal in humans and vice versa. This book is essential reading for undergraduate and postgraduate students researching sociology of emotions social psychology and contemporary social theory and is also relevant for students and researchers working in the fields of psychology and cultural studies.

What Is Emotion? Jerome Kagan, 2007-11-26 In this sophisticated overview of human emotions a widely respected psychologist and author addresses the ambiguities and embraces the controversies that surround this intriguing subject. An insightful and lucid thinker Jerome Kagan examines what exactly we do know about emotions which popular assumptions about emotions are incorrect and how scientific study must proceed if we are to uncover the answers to persistent and evasive questions about emotions. Integrating the findings of anthropological psychological and biological studies in his wide ranging discussion Kagan explores the evidence for great variation in the frequency and intensity of emotion among different cultures. He also discusses variations among individuals within the same culture and the influences of gender class ethnicity and temperament on a person's emotional patina. In his closing chapter the author proposes that three sources of evidence verbal descriptions of feelings behaviours and measures of brain states provide legitimate but different definitions of emotion. Translating data from one of these sources to another may not be possible. Kagan warns and those who study emotions must accept at least for now that their understanding is limited to and by the domain of their information.
