Governing by Design Aggregate Architectural History Collaborative, 2012-04-29 Governing by Design offers a unique perspective on twentieth century architectural history It disputes the primacy placed on individuals in the design and planning process and instead looks to the larger influences of politics culture economics and globalization to uncover the roots of how our built environment evolves In these chapters historians offer their analysis on design as a vehicle for power and as a mediator of social currents Power is defined through a variety of forms modernization obsolescence technology capital ergonomics biopolitics and others The chapters explore the diffusion of power through the establishment of norms and networks that frame human conduct action identity and design They follow design as it functions through the body in the home and at the state and international level Overall Aggregate views the intersection of architecture with the human need for what Foucault termed governmentality societal rules structures repetition and protocols as a way to provide security and tame risk Here the conjunction of power and the power of design reinforces governmentality and infuses a sense of social permanence despite the exceedingly fluid nature of societies and the disintegration of cultural memory in the modern era

Four Walls and a Roof Reinier de Graaf, 2017-09-25 A Financial Times Best Book of the Year A Guardian Best Architecture Book of the Year Sharp revealing funny The Guardian An original and even occasionally hilarious book about losing ideals and finding them again De Graaf deftly shows that architecture cannot be better or more pure than the flawed humans who make it The Economist Architecture we like to believe is an elevated art form that shapes the world as it pleases Four Walls and a Roof turns this fiction on its head offering a candid

account of what it's really like to work as an architect Drawing on his own tragicomic experiences in the field Reinier de Graaf reveals the world of contemporary architecture in vivid snapshots from the corridors of wealth in London Moscow and Dubai to the demolished hopes of postwar social housing in New York and St Louis We meet ambitious oligarchs developers for whom architecture is nothing more than an investment and layers of bureaucrats consultants and mysterious hangers on who lie between any architect's idea and the chance of its execution This is a book about power money and influence and architecture's complete lack of any of them Witty insightful and funny it is a sometimes painful dissection of a profession that thinks it is still in control Financial Times This is the most stimulating book on architecture and its practice that I have read for years Architects Journal

The Organic Line Irene V. Small, 2024-10-08 A major rethinking of twentieth century abstract art mobilized by the work of Brazilian artist Lygia Clark What would it mean to treat an interval of space as a line thus drawing an empty void into a constellation of art and meaning laden things In this book Irene Small elucidates the signal discovery of the Brazilian artist Lygia Clark in 1954 a fissure of space between material elements that Clark called the organic line For much of the history of art Clark's discovery much like the organic line has escaped legibility Once recognized however the line has seismic repercussions for rethinking foundational concepts such as mark limit surface and edge A spatial cavity that binds discrepant entities together the organic line transforms planes into flexible topologies borders into membranes and interstices into points of connection As a paradigm the organic line has profound historiographic implications as well inviting us to set aside traditional notions of influence and origin in favor of what Small terms weak links and plagiotropic relations These fragile oblique and transversal ties have their own efficacy and Small's innovative readings of canonical modernist

works such as Kazimir Malevich's Black Square, John Cage's 4 33 and Le Corbusier's machine habiter as well as contemporary works by such artists as Adam Pendleton, Ricardo Basbaum and Mika Rottenberg reveal the organic line's remarkable potential as an analytic instrument. Mobilizing a rich repertoire of archival sources and moving across multiple chronologies, geographies and disciplines, this book invites us to envision modernism not as a stable construct defined by centers and peripheries, inclusions and exclusions, but as a topological field of interactive, destabilizing tensions. More than a history of a little-known artistic device, *The Organic Line: Toward a Topology of Modernism* is a user's guide and manifesto for reimagining modern and contemporary art for the present. *The Architects' Journal*, 2002. *The Architect in Practice* David Chappell, Andrew Willis, 2010-07-13. *The Architect in Practice* was first published in 1952. Originally written by a quantity surveyor and an architect, it has remained through its nine editions a leading textbook used in the education of architects world-wide. While the format of the book has developed, the message and philosophy remains the same as the original, to provide the student of architecture and the young practitioner with a readable guide to the profession, outlining an architect's duties to client and contractor, the key aspects of running a building contract and the essentials of management, finance and drawing office procedure. The tenth edition follows in that tradition. The authors, still an architect and a quantity surveyor, have brought the text fully up to date. Major revisions in this edition include Revised sections on Planning and the Building Regulations. Changes to the education of architects in the UK have been detailed. Discussion of the new ARB Architects Code, Standards of Professional Conduct and Practice, which came into force in January 2010. The commentary on the RIBA Standard Form for the Appointment of an Architect 1999 SFA 99 has been updated. The latest RIBA Standard Agreement 2010 S 10 A is now discussed. All references to JCT contracts have been updated to refer to the latest revisions of the 2005 suite of contracts. Now also includes reference to education registration and CPD requirements of the Royal Institute of the Architects of Ireland. The tenth edition of *The Architect in Practice* will continue to provide the guidance and advice all students and practising architects need in the course of their studies and in their profession. *Planning and Designing the Absent City* Luca Trabattini, 2024-06-27. This book concerns the study of open-air accommodation facilities. The market evolutions allow us to look at these structures as temporary settlements characterised by a low-density dwelling and a close connection with natural elements and the landscape. This new and different point of view is sustained by the tendency of outdoor tourism to go in the direction of temporary villages, and this tendency is directly related to time and landscape. The landscape is the reason why the campsite is settled. The time is linked to the holiday season timing. Today both are greatly influenced by the introduction of the Maxi Caravan. This removable living unit can be placed on the empty pitch, occupying the landscape without ruining the soil. By the settlement of Maxi Caravans, the campsite is transformed from an empty landscape with tents to a temporary settlement whose timing is divided between the seasonal timing of the campsite and the timing of the product, and whose landscape is organised by the relation with the prevalent landscape and the internal one. The

book's core defines the outdoor facility structure using Italy as the main case study. To identify design strategies, the book analyses temporary settlement examples: quick time and projects from historic outdoor tourism (medium time). Finally, the last chapter reflects on open air accommodation facilities by showing their applicability in the different contexts of the refugee camps (long time). The aim of this research is to enhance the theme of open air accommodation facilities, highlighting the need to equalise the study of temporary settlements with that of permanent settlements. It will be of interest to researchers and students of planning, landscape and tourism.

Architectural Technology, 1999 **Progressive Architecture**, 1982
AIA Journal American Institute of Architects, 1982 **Archis**, 2001 **RIBA Annual Review of Periodical Articles**
Royal Institute of British Architects, 1967 *Use Matters* Kenny Cupers, 2013-10-15. From participatory architecture to interaction design: the question of how design accommodates use is driving inquiry in many creative fields. Expanding utility to embrace people's everyday experience brings new promises for the social role of design. But this is nothing new. As the essays assembled in this collection show, interest in the elusive realm of the user was an essential part of architecture and design throughout the twentieth century. *Use Matters* is the first to assemble this alternative history from the bathroom to the city, from ergonomics to cybernetics and from Algeria to East Germany. It argues that the user is not a universal but a historically constructed category of twentieth century modernity that continues to inform architectural practice and thinking in often unacknowledged ways.
