

An aerial photograph of a lush green valley with terraced rice fields. The terraces are arranged in neat, curved rows that follow the contours of the hills. A winding road or path is visible in the center of the valley, and there are some small buildings or structures scattered throughout. The background shows more hills and a clear sky.

Medicine, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Geographical Sciences Committee, Committee on Identifying Transformative Research in the Geographical Sciences, 2019-03-22 The central purpose of all research is to create new knowledge In the geographical sciences this is driven by a desire to create new knowledge about the relations between space place and the anthropogenic and non anthropogenic features and processes of the Earth But some research goes beyond these modest aims and creates new opportunities for further research or affects the process of knowledge acquisition more broadly or changes the way other researchers in a domain think about the world and go about their business Due to its positive impacts transformative research can be regarded as inherently having greater value than more conventional research and funding agencies clearly regard transformative research as something to be encouraged and funded through special programs Assessments of transformative research funding initiatives are few and provide a mixed picture of their effectiveness The challenge is whether transformative research can be identified at the time it is proposed rather than after it has been conducted communicated and its influence on the discipline has become clear Fostering Transformative Research in the Geographical Sciences reviews how transformative research has emerged in the past what its early markers were and makes recommendations for how it can be nurtured in the future Research Opportunities in Geography at the U.S. Geological Survey National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee on Research Priorities in Geography at the U.S. Geological Survey, 2002-11-24 Research Opportunities in Geography at the U S Geological Survey USGS provides perspective and guidance to the geography discipline about its future research and strategic directions The book makes specific recommendations about scientific research priorities and partnerships within and outside the agency and outlines a long term core research agenda for the USGS An Introduction to Scientific Research Methods in Geography Daniel R. Montello, 2006 Explaining the key elements of scientific philosophy and basic research concepts this text discusses all parts of the research process including generating research ideas data analysis and the use of geographic information techniques **Geography Education Research in the UK: Retrospect and Prospect** Graham Butt, 2019-08-22 This book provides a unique assessment of the development of research in geography education and its future prospects offering a challenging critique of subject based education research with particular reference to geography education across a range of different jurisdictions It covers a range of topics including the changing role of research in geography education the relationship between education research and professional practice with special reference to geography education research the place of academic subject knowledge in geography education research critiques of the functions of research in geography education and the key issues for education policy and policymakers concerning educational research at national and international levels Importantly in a period marked by radical change for education research and researchers the book offers a timely appraisal of possible ways forward for geography education research Addressing the needs of academics research students policymakers and education practitioners who

undertake use or shape the future of research in geography education it comprehensively explores the forces that have driven the development of geography education research and pedagogy Further by positioning its analysis in the context of education policy debates in the UK and further afield it assesses the role and function of research in education and offers an outlook on its future This book is essential reading for all those who wish to understand the sporadic and increasingly uncertain development of subject based research in education
