

KUMON® DESCRIPTION OF STUDY LEVELS - MATH

Level	Samples			Highlights
7A	 7A 75a	 7A 76b	 7A 151a	Students count up to 10 pictures and dots individually and as a group. Mastery is gradual and the eventual goal is for students to be able to say the total number of objects in each group without counting.
6A	 6A 37a	 6A 90a	 6A 175a	Students count up to 30 using pictures and numbers. Gradually, students learn to recognize groups of up to 20 dots without counting them individually.
5A	 5A 41a	 5A 147a	 5A 187a	Students learn to use a pencil through line tracing exercises, beginning with short lines and advancing to long curved lines. The curved lines gradually take the shape of large numbers. This develops the fine motor skills needed to trace and write numbers independently and teaches the natural stroke order required for number formation. Students also develop their concentration ability and learn to recite numbers up to 50.
4A	 4A 40a	 4A 75a	 4A 150b	Students learn to write numbers up to 50. Students deepen their understanding of the number sequence through writing consecutive numbers and filling in the blanks in number tables, number boards, and complete-the-sequence problems. By the end of the level, students learn to read up to 100.
3A	 3A 60b	 3A 74a	 3A 195a	Students continue to enhance their understanding of the sequence of numbers as well as the number-writing skills that they developed in Level 4A. Students are introduced to addition in Level 3A. At first, they master +1, +2, through to +3 individually. The last 20 sheets of this level are dedicated to addition questions from +1 to +3.
2A	 2A 31a	 2A 76b	 2A 200b	In this level, students further develop basic mental calculation skills in addition through a sequential study of adding 1 through adding 10. It is very important that students master the contents of this level for smooth progress in subsequent levels. Level 2A aims to develop the concentration ability and work skills necessary for Level 3.
A	 A 196a	 A 196b	 A 196c	Level A continues horizontal addition with larger numbers. Mastering addition involves a smooth transition to subtraction in this level. This level aims to develop mental calculations, while strengthening students' concentration ability and their work skills.
B	 B 196a	 B 196b	 B 196c	This level teaches vertical addition and subtraction. Throughout B, students will encounter their first word problems in math. This level aims to develop mental calculation skills learned in previous levels when students "play" in addition questions and "borrow" in subtraction. Mastering subtraction in Level B greatly reduces errors in multiplication and division in Levels C and D.
C	 C 196a	 C 196b	 C 196c	Students master the multiplication tables by practicing and they can create multiplication. First, students learn up to 4-digit by 1-digit multiplication with mental components. Once multiplication is mastered, single division by 1-digit is introduced. Students who have developed good mental calculation ability will not have to write down steps.
D	 D 196a	 D 196b	 D 196c	Students learn double-digit multiplication before advancing writing down steps. In the challenging section, students learn writing down steps that will be necessary for future fraction work. Once students' ability to work with all 4 arithmetic operations is confirmed, they begin to study fractions. Learning to reduce using the Greatest Common Factor.
E	 E 196a	 E 196b	 E 196c	Students learn to add, subtract, multiply, and divide. Students begin to understand steps and operations. At the end of the level, students learn basic mathematical concepts.
