*Comparative Labour Law and Industrial Relations in Industrialized Market Economies* Roger Blanpain,2007

Comparativism is no longer a purely academic exercise but has increasingly become an urgent necessity for industrial relations and legal practitioners due To The growth of multinational enterprises And The impact of international and regional organizations aspiring to harmonize rules The growing need for comprehensive up to date and readily available information on labour law and industrial relations in different countries led to the publication of the International Encyclopaedia for Labour Law and Industrial Relations In which more than 70 international and national monographs have thus far been published This book *Comparative Labour Law and Industrial Relations in Industrialized Market Economies* goes a step further than the Encyclopaedia in as much as most of the chapters provide comparative and integrated thematic treatment The aim is to describe the salient characteristics and trends in labour law and industrial relations in the contemporary world This book is obviously not exhaustive with respect to the coverage of countries and topics The authors limit themselves mainly to the industrialized market economies The book is divided in three main parts an introduction relating to methodology and documentation including the use of Internet The second part concerns international actors like the International Employers' Organisations And The International Trade Union Movement As well as Human Resources Management The third concerns the sources of regulation concentrating on International and European Labour Law as well as on Codes of Conduct for Multinational Enterprises and describes also the rules in case of conflict of laws The last part deals with international developments and comparative studies in not less than 15 chapters The IXth edition will like the previous editions serve as a textbook and reference work to facilitate the task of teachers and students of comparative labour law and industrial relations it will also provide labour lawyers with the necessary insights to cope with a world which is increasingly international

Comparativism is no longer a purely academic exercise but has increasingly become an urgent necessity for industrial relations and legal practitioners

due To The globalisation of the economy The massive introduction of new information technology The growth of multinational enterprises And The impact of international and regional organizations aspiring to harmonize rules the growing need for comprehensive up to date and readily available information on labour law and industrial relations in different countries led To The publication of the International Encyclopaedia for Labour Law and Industrial Relations In which almost 70 international and national monographs have been published thus far This book goes a step further than the Encyclopaedia inasmuch as most of the chapters provide comparative and integrated thematic treatment Our aim is to describe the salient characteristics and trends in labour law and industrial relations in the contemporary world Encouraged by the warm reception of the first six editions we hope that also the seventh edition will serve as a textbook and reference work to facilitate the task of teachers and students of comparative labour law and industrial relations We hope too that the book will provide labour lawyers HRM and industrial relations specialists with the necessary insights to cope with a world which is increasingly international *Report on Working Children and Women in Myanmar's Urban Informal Sector* ,1997

Labour Rights as Human Rights Philip Alston,2005 Are efforts to protect workers rights compatible with the forces of globalization How can minimum standards designed to protect labor rights be implemented in a world in which national labor law is more and more at the mercy of international forces beyond its control The contributors to this volume argue that international agreements and institutions are of central importance if labor rights are to be protected in a globalized economy exploring some of the options that are open to governments civil society and the labor movement in the years ahead
