Information Technology** David L. Olson,2012-01-06 In the past vertical integration was a way to gain efficiency in supply
chains Today vertical integration doesn t work as well because specialty organizations have developed to perform specific
tasks very efficiently Efficiency through supply chains is achieved today by linking specialists throughout the vertical
business hierarchy This sort of linkage is possible because of the technology that has developed which facilitates it making
today supply chains both faster and more cost effective Supply Chain Information Technology surveys the different systems
that are used by businesses to achieve these efficiencies The target market for this book is practitioners in the supply chain
management field one of the fastest growing fields in our economy The rapid growth in computer technology provides supply
chains with valuable tools to better coordinate and control their operations This book describes how these systems provide
supply chains with information system support The design of these systems and the tasks they perform are demonstrated
with the help of analytic techniques and models that are used in the book Computerworld ,2004-05-17 For more than 40
