The Marshmallow Test Walter Mischel, 2015-09-10 A child is presented with a marshmallow and given a choice Eat this one now or wait and enjoy two later What will she do And what are the implications for her behaviour later in life Walter Mischel s now iconic marshmallow test one of the most famous experiments in the history of psychology proved that the ability to delay gratification is critical to living a successful and fulfilling life self control not only predicts higher marks in school better social and cognitive functioning and a greater sense of self worth it also helps us manage stress pursue goals more effectively and cope with painful emotions But is willpower prewired or can it be taught In his groundbreaking new book Dr Mischel draws on decades of compelling research and life examples to explore the nature of willpower identifying the cognitive skills and mental mechanisms that enable it and showing how these can be applied to challenges in everyday life from weight control to quitting smoking overcoming heartbreak making major decisions and planning for retirement With profound implications for the choices we make in parenting education public policy and self care *The Marshmallow Test* will change the way we think about who we are and what we can be And since as Mischel argues a life with too much self control can be as unfulfilling as one with too little this book will also teach you when it s time to ring the bell and enjoy that marshmallow

years this volume has been reissued in response to an increasing demand for copies This reflects that the fundamental questions that motivated this book thirty years ago are still being asked But more important the answers or at least their outlines now seem to be in sight In 1968 this book stood as an expression of a paradigm crisis in its critique of the state of personality psychology The last three decades have been filled with controversy and debate about the dilemmas raised here and then with renewal and fresh discoveries It therefore seems especially timely to revisit the pages which posed the challenges Mischel outlined the need to encompass the situation in the study of personality but with a focus on the acquired meaning of stimuli and on the situation as perceived viewing the individual as a cognitive affective being who construes interprets and transforms the stimulus in a dynamic reciprocal interaction with the social world He focused on the idiographic analysis of personality that had originally motivated the field and the complexity discriminative facility and uniqueness of the individual and sought to connect the expressions of personality to the individual's behavior that is to what people do and not just what they say Even the intrinsically contextualized if then expressions of the personality system its essential behavioral signatures were foreshadowed in this book that fired the opening salvo in a search for a truly dynamic personality psychology
