

Gradient concept

In addition to color swatches, you can use the ability to apply various gradients to objects.

1 With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Linear** to apply a default gradient. Drag across your object to create a custom path for the gradient.

2 Drag across the artwork to change the length and direction of the gradient path, and drag the midpoint marker to change the midpoint of the gradient between the current colors.

3 Rotate the handle along the path to create a blue-to-purple gradient, which can then be moved along the gradient path.

With a gradient applied, you can adjust the color and the position of the gradient.

With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Linear** to apply a default gradient. Drag across your object to create a custom path for the gradient.

With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Linear** to apply a default gradient. Drag across your object to create a custom path for the gradient.

An alternative to an address to working with gradients directly on the object, there is a **Gradients** editor available from the **Color** palette on the toolbar. This **Gradients** editor gives you high precision drag positioning, as well as a few additional options.

You can work with **Elliptical** and **Radial** gradients in a similar way to **Linear** gradients. To create a **Radial** gradient, use the **Type** pop-up menu on the toolbar. **Radial** gradients are available on the **Color** & **Gradients** palette.

Affinity Designer Workbook
