EXAMPLE QUESTION 1

10 The table shows a segment of primary memory from a Von Neumann model computer.

Address	Contents
10001	11001101
10010	11110001
10011	10101111
10100	10000110
10101	00011001
10110	10101100

The program counter contains the data 10010.

(a) (i) State the data that will be placed in the memory address register (MAR).

..... [1]

(ii) State the data that will be placed in the memory data register (MDR).

..... [1]

(b) Describe the stored program concept when applied to the Von Neumann model.

Engineering Education John Heywood,2006-01-24 A synthesis of nearly 2 000 articles to help make engineers better educators While a significant body of knowledge has evolved in the field of engineering education over the years much of the published information has been restricted to scholarly journals and has not found a broad audience This publication rectifies that situation by reviewing the findings of nearly 2 000 scholarly articles to help engineers become better educators devise more effective curricula and be more effective leaders and advocates in curriculum and research development The author s first objective is to provide an illustrative review of research and development in engineering education since 1960 His second objective is with the

examples given to encourage the practice of classroom assessment and research and his third objective is to promote the idea of curriculum leadership The publication is divided into four main parts Part I demonstrates how the underpinnings of education history philosophy psychology sociology determine the aims and objectives of the curriculum and the curriculum's internal structure which integrates assessment content teaching and learning Part II focuses on the curriculum itself considering such key issues as content organization trends and change A chapter on interdisciplinary and integrated study and a chapter on project and problem based models of curriculum are included Part III examines problem solving creativity and design Part IV delves into teaching assessment and evaluation beginning with a chapter on the lecture cooperative learning and teamwork The book ends with a brief insightful forecast of the future of engineering education Because this is a practical tool and reference for engineers each chapter is self contained and may be read independently of the others Unlike other works in engineering education which are generally intended for educational researchers this publication is written not only for researchers in the field of engineering education but also for all engineers who teach All readers acquire a host of practical skills and knowledge in the fields of learning philosophy sociology and history as they specifically apply to the process of engineering curriculum improvement and evaluation

Architecture Exam Review: Structural topics David Kent Ballast,1999 Volume I Structural Topics is a comprehensive review of all structural portions of the ARE including structural systems building loads wood and steel construction soil and foundations lateral forces and long span structures Clear explanations of terms procedures and theories illustrated with more than 200 figures and tables reinforce the review This volume also includes an introduction to the exam and the grading process and 160 practice questions with solutions

Architecture Exam Review: Structural topics Steven E. O'Hara,David Kent Ballast,2002 The topics represented on the ARE may be roughly divided into two areas structural and nonstructural We offer two primary study guides for the exam one volume devoted to each area Each volume includes concise reviews of the exam topics with practice problems and solutions
