Conflict Analysis Tools Eth Z Rich:

Multi-Level Reconciliation and Peacebuilding Kevin P. Clements, SungYong Lee, 2020-12-06 This edited volume examines the group dynamics of social reconciliation in conflict affected societies by adopting ideas developed in social psychology and the everyday peace discourse in peace and conflict studies The book revisits the intra and inter group dynamics of social reconciliation in conflict affected societies which have been largely marginalised in mainstream peacebuilding debates By applying social psychological perspectives and the discourse of everyday peace the chapters explore the everyday experience of community actors engaged in social and political reconciliation The first part of the volume introduces conceptual and theoretical studies that focus on the pros and cons of state level reconciliation and their outcomes while presenting theoretical insights into dialogical processes upon which reconciliation studies can develop further The second part presents a series of empirical case studies from around the world which examine the process of social reconciliation at community levels through the lens of social psychology and discourse analysis This book will be of much interest to students of peacebuilding conflict resolution social psychology discourse analysis and international relations in general

Debriefing Mediators to Learn from Their Experiences Simon J. A. Mason, Matthias Siegfried, 2010 The goal of this handbook is to enhance the practice of mediation by showing how lessons from individual mediators can be identified and made available both to their home organization (e.g. a foreign ministry, intergovernmental organization or nongovernmental organization) and to a wider practitioner audience. More particularly, the handbook gives guidance to staff debriefing mediators who are or have been directly involved in peace negotiations. The focus here is not on self-assessments by the mediators themselves nor on evaluations of the mediator's performance by external donors nor on political or psychological debriefing. Instead, this handbook examines methodological debriefing that is interviews conducted with the goal of learning lessons about the mediation method from the experience of a specific mediator that are useful for future mediation processes. Methodological debriefing is typically conducted by individuals who have not been directly involved in the mediator's work and who do not seek to judge it but who want to learn the mediator's perspective on what was done and why it was done. Ideally, the mediator will also benefit from the interview by discovering something new through the questions posed by having the opportunity to recount a challenging experience or at least by having her or his experiences documented in a structured and objective manner.

NGOs Mediating Peace Julia Palmiano Federer, 2023-12-28 This book explores the role of nongovernmental mediators in promoting inclusive peace to negotiating parties in Myanmar's Nationwide Ceasefire Agreement (NCA) negotiations from 2011-2015. The influx of NGO mediators directly engaging with the negotiating parties and promoting the inclusivity norm coupled with the salience of discourse around all-inclusiveness at the end of the NCA process forms a puzzle around the agency that NGO mediators wield in influencing political outcomes despite their lack of political and material leverage. The author argues that NGO mediators can effectively promote norms using mediation processes as a site of norm diffusion.

Bespoke international conflict resolution NGOs have become key mediation actors within the last three decades through creating the niche world of private diplomacy and acting as norm entrepreneurs at the same time. As informal third parties, these NGO mediators directly engage with politically sensitive actors or convene unofficial peace talks. As NGOs, they are part of an epistemic community of mediation practice, professionalizing the field and producing knowledge on what peace mediation is and what it ought to be. This dual identity as both NGOs and mediators nicely sets them up with a unique agency to promote and diffuse norms. These norms often reflect the liberal peacebuilding paradigm promoted from the Global North such as inclusion, gender equality, and transitional justice, with the view that these norms are not ends in themselves but as necessary ingredients for effective mediation. The book further questions whether NGOs should promote norms in the first place. The outcome of the NCA process presents a critical and cautionary tale of promoting a presumed universal norm into a given locale and expecting a certain outcome without understanding how an external norm interacts with existing normative frameworks. The book

illustrates that while NGO mediators do possess the normative agency to effectively promote norms to negotiating parties my empirical research analyses how their promotion of the inclusivity norm to the negotiating parties in Myanmar's NCA paradoxically resulted in exclusionary outcomes only half of the armed groups in the ethnic armed groups negotiating bloc signed and civil society was effectively crowded out from meaningful participation despite lofty rhetoric This is an open access book

Metabolomics and Transcriptomics in Biomarker Discovery: Mass Spectrometric Techniques in Volatilome Research Andras Szeitz, Konstantinos Andreas Kouremenos, Steven Hallam, Jens Herbig, Shane Peter Fitzgerald, 2025-01-30

Metabolites are generated in part during catabolism when the consumed sources of energy undergo biotransformation energy and metabolites are produced and the latter eliminated from the body Volatile organic compounds VOCs semi VOCs SVOCs etc can be representatives of the metabolic processes but also can be generated in pathologic conditions of organisms as signaling agents that transmit potential etiologic information on the disease states of the host With recent advances in molecular biology and diagnostics new forms of interdisciplinary science link VOC and SVOC production with genome transcriptomic and proteomic data sets and through biomarker discovery translation and validation coupled with the latest advances in mass spectrometry they contribute significantly to the emerging area called volatilome research Volatilome research emerges in part from the awareness that organisms emit biomarker VOCs representative of their physiological state stress conditions etc and on the mediating interactions between the host and the environment For example human and animal breath contains a vast number of VOCs that translate information about their health and in case of plants VOCs can be released in response to an external trigger such as temperature or osmotic stress herbivore perturbations etc Plant foliar VOCs contribute to potential application in crop stress response defense and enhanced biomass production which offers a renewable feedstock for sustainable energy and materials production within a biorefining context Multi omics is a valuable tool to investigate the processes involved in the fate of VOCs and their use as potential biomarkers in the inter species microbiome utilizing the latest technologies in analytical chemistry such as multidimensional gas or ultra high performance liquid chromatography coupled with high resolution mass spectrometry

Mathematical Modeling and Computational Predictions in Oncoimmunology Vladimir A. Kuznetsov, Heiko Enderling, Mark Chaplain, 2024-06-06

Cancer is a complex adaptive dynamic system that causes both local and systemic failures in the patient Cancer is caused by a number of gain of function and loss of function events that lead to cells proliferating without control by the host organism over time In cancer the immune system modulates cancer cell population heterogeneity and plays a crucial role in disease outcomes The immune system itself also generates multiple clones of different cell types with some clones proliferating quickly and maturing into effector cells By creating regulatory signals and their networks and generating effector cells and molecules the immune system recognizes and kills abnormal cells Anti cancer immune mechanisms are realized as multi layer nonlinear cellular and molecular interactions A number of factors determine the outcome of immune system tumor interactions including cancer
