Introduction:

Definitions:

- (1) *“The term capital budgeting generally refers to acquiring inputs with long-run returns.”*
– Richards & Greenlaw
- (2) *“Capital budgeting is long-term planning for making and financing proposed capital outlay.”*
– Charles T. Horngreen
- (3) *“Capital budgeting consists of planning, the development of available capital for the purpose of maximising the long term profitability (return on investment) of the firm.”*
– R. M. Lynch
- (4) *“Capital budgeting is concerned with the allocation of the firm’s scarce financial resources among the available market opportunities. The consideration of investment opportunities involve the comparison of the expected future streams of earnings from a project, with the immediate and subsequent streams of expenditures for it.”*
– G. C. Philipatos
- (5) *“Capital budget is essentially a list of what management believes to be worthwhile projects for the acquisition of new capital assets together with the estimated cost of each product.”*
– Robert N. Anthony

Capital budgeting means a decision relating to planning for capital assets (e.g. purchase of a new machine or setting up of a factory) as to whether or not money should be invested in the long-term projects. Capital budgeting involves a financial analysis of the various alternative proposals regarding a capital expenditure and to select/choose the best out of the several alternatives. Capital budgeting technique is employed to evaluate expenditure decisions which involve current outlays but are likely to produce benefits over a period of time, usually exceeding one

Engineering and Construction Stephen Ogunlana, Prasanta Kumar Dey, 2019-09-09 Today's businesses are driven by customer pull and technological push To remain competitive in this dynamic business world engineering and construction organizations are constantly innovating with new technology tools and techniques to improve process performance in their projects Their management challenge is to save time reduce cost and increase quality and operational efficiency Risk management has recently evolved as an effective method of managing both projects and operations Risk is inherent in any project as managers need to plan projects with minimal knowledge and information but its management helps managers to become proactive rather than reactive Hence it not only increases the chance of project achievement but also helps ensure better performance throughout its operations phase Various qualitative and quantitative tools are researched extensively by academics and routinely deployed by practitioners for managing risk These have tremendous potential for wider applications Yet the current literature on both the theory and practice of risk management is widely scattered Most of the books emphasize risk management theory but lack practical demonstrations and give little guidance on the application of those theories This book showcases a number of effective applications of risk management tools and techniques across product and service life in a way useful for practitioners graduate students and researchers It also provides an in depth understanding of the principles of risk management in engineering and construction **Extended Comparison Tool for Major Highway**

Projects James H. Lambert, 2003 Under the Virginia Transportation Act signed into law in April 2000 more than 10 billion

would have been invested in highway construction public transportation airports and ports during the following 6 years However recent budgetary constraints will result in a delay in investing more than 2 billion in road projects for more than a decade In the current study a previously developed comparison tool was extended to bring quantitative evidence of safety and categorical evidence of broad motivations to planners engineers and the public in comparing the benefits of proposed transportation projects The extended tool developed in the current study provides visual devices for presenting multifaceted information about project attributes Policymakers and planners may find the presentation useful in assessing what types of projects are being undertaken and what projects to prefer to others The extended tool represents project information including cost average daily traffic and crash rates for comparison and prioritization of the 1 500 candidate projects that constitute the development plan of Virginia highways The extended tool is flexible to accommodate applications such as project selection planning and programming Several sources of information include the crash databases of the Virginia Department of Transportation VDOT and project plans for districts and localities The extended tool enables planners to identify principal motivations for various projects based on categories defined by the Transportation Equity Act for the 21st Century The tool introduces summary reports of criteria including project aggregate costs and counts of projects with particular motivations facilitating system level analyses and project ranking The summary reports can be useful to interpret outcomes of human deliberation or multicriteria rating and ranking processes some of which are demonstrated in this study in the body of the report and in a substantial appendix The major innovation of the extended comparison tool is its ability to synthesize the relevant quantitative and categorical information on a large and diverse portfolio of highway investments bringing more evidence to the table earlier in the planning process Three case studies demonstrate the application of the extended comparison tool in short medium and long term transportation plans These case studies are the VDOT Culpeper District Transportation Development Plan a 6 year plan long range financially constrained plans of selected small Virginia localities and the long range plan of the Thomas Jefferson Planning District Commission The incremental data to assess over 100 projects in a VDOT District Six Year Plan were collected in 90 minutes providing an advantage over typical methods that can require several hours or more per project Recommendations are given for implementation of the extended comparison tool and further development of the software prototype
