

# Thinking Fast & Slow

Daniel Kahneman  
[Summarized in 6 points]

01

explores the two systems of thought that drive our decision-making processes: the intuitive and automatic "fast" system and the deliberate and effortful "slow" system.

02

presents a ton of research and insights from psychology & behavioral economics to illustrate how these two systems shape our judgments and biases.

03

highlights the concept of cognitive biases, showing how our minds often take mental shortcuts and fall victim to systematic errors in thinking, leading to flawed decision-making and inaccurate judgments.

04

delves into the psychology of happiness and explores how our memories and experiences of past events can greatly impact our overall well-being

05

provides a comprehensive framework for understanding the complexities of human thinking, decision-making, and the various cognitive biases that shape our perception of the world

06

introduces the idea of the "anchoring effect," where our decisions are influenced by arbitrary points, and "availability heuristic," leading to overestimate the importance of easily recalled information.
