Comparative Public Law :

Introduction to Public Law Elisabeth Zoller, 2008 Introduction to Public Law is a historical and comparative introduction to public law The book traces back the origins of the res publica to Roman law and analyzes the course of its development first during the monarchical age in continental Europe and England and then during the republican age that began at the end of the eighteenth century with the democratic revolutions in the United States and France For each period and country the book analyzes the major concepts of public law and their transformations sovereignty the state the statute the separation of powers the public interest and administrative justice Comparative Public Law for European Society Armin von

Bogdandy, 2022 This contribution theorizes European comparative public law through its function for European society It starts by reconstructing European law as a body of law that encompasses various legal orders and European society as its social reference Next it outlines the specific role of comparative arguments in European public law their legal and methodological bases and the gulf between the new and the old Jus Publicum Europaeum A comparative reconstruction of constitutional courts then illustrates this theorization It deepens the understanding of these key actors of European law while exemplifying European society's commonalities as well as multiple modernities Finally the article shows how the European comparative setting impacts on scholarly identities and mindsets **COMPARATIVE PUBLIC LAW (Comparative**

Constitutional Law and Comparative Administrative Law) Contributions to the International Academy of Comparative Law 1966-2022

Allan R. Brewer-Carías, 2024-10-12 This book of Professor Allan R Brewer Carías is a recollection of all his contributions to the the International Academy of Comparative Law on matters of Comparative Public Law Comparative Constitutional Law and Comparative Administrative Law submitted between 1966 and 2022 as General Reports to the Congresses of the Academy held in Uppsala August 1966 Pescara August September 1970 Tehran August September 1974 Caracas August September 1982 in Montreal August 1990 Bristol July August 1998 and Washington July 2010 as well as all the Venezuelan National Reports on the same matters sent to the Academy for its consideration by the respective General Reporters in the International Congresses of Uppsala 1966 Budapest 1978 Caracas 1982 Brisbane 2002 Utrecht 2006 Mexico 2008 Vienna 2014 and La Asunci n 2022 *Security, Constitutionalism and Legal Systems* Paola

Piciacchia, 2026-02-20 The book explores through new studies the theme of security in its multiple declinations from a comparative and European public law perspective It highlights the current complexity of the dynamics related to public security at the domestic and international levels and the reflections that these dynamics may have on contemporary constitutionalism and the rule of law It critically examines how contemporary challenges reshape the concept of security and its relationship with democratic governance and fundamental rights From this perspective the volume presents different analytical contributions that together create a multifaceted picture as does the importance of new reflections on emerging challenges such as those determined by evolving technologies In light of this picture by integrating theoretical analysis with

empirical case studies this volume provides a comprehensive perspective on security and defence governance in contemporary legal systems and helps to understand the complexity of security profiles which today tend to intertwine These analyses increasingly demonstrate the need for state resilience responsiveness and the coordination of public defence and security policies

Comparative Public Law Scholarship in the United States John C. Reitz, 2023 The article addresses the paradoxical nature of comparative public law scholarship in the United States The globalization of life makes foreign law as inescapable in the United States as in any other modern country Foreign law models played a substantial role at the founding of the country and for some time thereafter when there was not much American law But today comparative study of foreign models of public law plays hardly any role at all in the preparation of legislation or constitutional amendments in the United States and a high profile debate at the Supreme Court revealed significant antipathy on the Court to the use of comparative law in interpreting domestic law In those senses comparative public law scholarship appears to have little impact on U S law There are moreover a number of unique features of American law that make it difficult to import legal models from other countries most notably the especially strong skepticism toward reliance on the state and state regulation that pervades American society and legal thinking about law One might conclude that a cosmopolitan world view is not very strong in America but the article argues for a more nuanced view The forces of globalism expose lawyers and courts in the United States constantly to foreign and international law immigration continues to enrich the body of scholars working and teaching in the United States and there is a rich body of foreign and comparative law scholarship in English that is readily available to students and scholars in the United States and that is produced at least in substantial part by scholars working in the United States These features attest to a curiosity and openness in the United States to learning about foreign law The article argues that America is home to strong tendencies in both directions cosmopolitanism and its opposite nationalism or chauvinism and comparative public law scholarship in the United States should be seen as navigating between these opposing impulses

Institutions & Public Law Robert A. Kagan, 2005 *Institutions Public Law Comparative Approaches* is a set of essays on the politics of law and courts by leading public law scholars in the United States Europe and Latin America The essays share the view that understanding courts requires attention to the political dynamics that shape judicial design and authority as well as the position of courts within the broader political system This volume is essential reading for undergraduate and graduate courses in judicial politics

Stabilization Clauses in International Investment Law Jola Gjuzi, 2018-12-05 This book analyzes the tension between the host state's commitment to provide regulatory stability for foreign investors which is a tool for attracting FDI and generating economic growth and its evolving non economic commitments towards its citizens with regard to environmental protection and social welfare The main thesis is that the stabilization clause regulatory power antinomy as it appears in many cases contradicts the content and rationale of sustainable development a concept that is increasingly prevalent in national and international law and which aims at the integration and balancing of economic environmental and

social development To reconcile this antinomy at the decision making and dispute settlement levels the book employs a constructive sustainable development approach which is based on the integration and reconciliation imperatives of the concept of sustainable development as well as on the application of principles of law such as non discrimination public purpose due process proportionality and more generally good governance and rule of law It subsequently re conceptualizes stabilization clauses in terms of their design ex ante and interpretation ex post yielding stability to the benefit of foreign investors while also mitigating their negative effects on the host state s power to regulate

Free Speech and the Politics of Identity David A. J. Richards, 1999 Free Speech and the Politics of Identity challenges the scholarly view as well as the dominant legal view outside the United States that the right of free speech may reasonably be traded off in pursuit of justice to stigmatized minorities These views appeal to an alleged reasonable balance between two basic human rights the right of free speech and the right against unjust discrimination Compelling arguments of normative political theory and interpretative history show however that these rights are structurally linked the abridgement of one compromises the other To make this case David Richards offers an original political theory of toleration and of structural injustice that addresses the nature and scope of the right of free speech and the right against unjust discrimination its analytic focus is on the role played by members of subordinated groups in the protest of the terms of structural injustice the politics of identity advancing constitutional justice under law While the argument is developed on the basis of American constitutional experience from the antebellum period forward its normative force is brought to bear both in defending and criticizing some aspects of American law and in challenging the continuing legitimacy of laws against group libel obscenity and blasphemy under national legal systems including Germany France Britain Canada Israel India South Africa and others regional systems the jurisprudence of the European Court of Human Rights and public international law The book s innovative normative and interpretative methodology calls for a new departure in comparative public law in which all states responsibly address their common problems not only of inadequate protection of free speech but correlative failure to take seriously the continuing political power of such evils as anti-Semitism racism sexism and homophobia

Proportionality and Deference in Investor-State Arbitration Caroline Henckels, 2015-10-15 In this study Caroline Henckels examines how investment tribunals have balanced the competing interests of host states and foreign investors in determining state liability in disputes concerning the exercise of public power Analyzing the concepts of proportionality and deference in investment tribunals decision making in comparative perspective the book proposes a new methodology for investment tribunals to adopt in regulatory disputes which combines proportionality analysis with an institutionally sensitive approach to the standard of review Henckels argues that adopting a modified form of proportionality analysis would provide a means for tribunals to decide cases in a more consistent and coherent manner leading to greater certainty for both states and investors and that affording due deference to host states in the determination of liability would address the concern that the decisions of investment tribunals unjustifiably

investor State arbitration proceedings within the EU has triggered an extensive backlash and an increased questioning of the
international investment law regime by different Member States as well as the EU Commission This has resulted in the EU s
assertion of control over the intra EU investment regime by promoting the termination of bilateral intra EU investment
treaties intra EU BITs and by opposing the jurisdiction of arbitral tribunals in intra EU investor State arbitration proceedings
Against the backdrop of the landmark Achmea decision of the European Court of Justice the book offers an in depth analysis
of the interplay of international investment law and the law of the European Union with regard to intra EU investments i e
investments undertaken by an investor from one EU Member State within the territory of another EU Member State It
specifically analyses the conflict between the two investment protection regimes applicable within the EU with a particular
emphasis on the compatibility of the international legal instruments with the law of the European Union The book thereby
addresses the more general question of the relationship between EU law and international law and offers a conceptual
framework of intra European investment protection based on the analysis of all intra EU BITs the Energy Charter Treaty and
EU law as well as the arbitral practice in over 180 intra EU investor State arbitration proceedings Finally the book develops
possible solutions to reconcile the international legal standards of protection with the regionalized transnational law of the
