human driver or reduce or even eliminate the human driver s role are becoming increasingly prevalent in new light duty

vehicles used by the general public These technologies are divided between Active Safety features that monitor the human

driver and vehicle motion and act intermittently to mitigate and avoid crashes and Driving Automation features that assume

some or all of the dynamic driving task from the human driver Both types of technologies have the potential to reduce

injuries and save lives by reducing the frequency and or severity of crashes Safety Impacts of Active Safety and Driving

Automation Features addresses the current capabilities and future potential for Active Safety and Driving Automation

features to reduce crash frequency and severity and provides an overview of the state of the industry for both types of
