Ebook Digital Literacy Manual:

Teaching Internet Basics Joel A. Nichols, 2014-10-14 Perfect for public librarians instructional librarians technology and digital resource specialists and library training specialists this book is an essential resource for digital literacy instruction According to Pew research published in 2013 two thirds of public libraries report that technology training is important in their communities and that 86.5 percent of public libraries offer classes on general Internet use Despite the ubiquitous nature of the Internet and digital media digital literacy instruction remains one of the major job duties of 21st century librarians In this book author Joel Nichols helps you to close the digital divide and make a difference in increasing information and digital literacy for your patrons offering tested content and methods that will make it easier for librarians to provide effective digital literacy instruction With its discussion of key Internet safety and security topics for inexperienced Internet users this hands on practical guide is what you need for approaching and solving these digital literacy instructional challenges This manual serves librarians who are teaching computer and Internet basics to patrons with little or no experience by providing a packaged solution with ready made training scripts and practical examples that teach basic digital literacy techniques The guide also fills any gaps in your knowledge or experience and gets you up to speed with the latest digital information needs of users in order to form a solid foundation from which to provide instruction with the supplied curriculum

Thinking Critically through Digital Media Nik Peachey, Although the use of internet and digital materials in the language classroom has come a long way over the last 25 years still the vast majority of web based material that finds its way into the language classroom is used for information input or comprehension purposes The students interaction with the materials is as such largely passive with the teacher controlling the suitability of the materials selected and deciding what information the students will extract from it In *Thinking Critically through Digital Media* I have tried to build on this model but develop it and take it to deeper and more critical levels of analysis that go beyond the superficial linguistic level and help to develop students not only as English language speakers but as capable information literate participants in the global knowledge economy The book uses as its basis the development of key digital literacies These include the ability to understand visually presented data the ability collect and analyse data using a range of techniques and survey tools and the ability to create and deliver a range of presentation types using digital media tools Whilst developing these digital literacies students are also encouraged to assess the validity credibility and underlying bias of the information they study and are given a range of research tools and techniques for reassessing the information and evaluating how it fits within their personal framework of belief systems and values The book itself has four main chapters The first three chapters contain a range of activities that teachers can use with students to develop their abilities to understand and create infographics develop research polls and surveys and create and deliver presentations These activities give students hands on exposure to a range of recommended tools and develop students as active creators of information whilst developing their abilities to work

collaboratively in digital online environments The fourth key chapter of the book is a collection of lesson plans that teachers can use to take students through a complete process from accessing their existing knowledge about a topic understanding new input examining how the information fits into their existing value scheme checking the credibility and validity of the information carrying out their own parallel research through social media to finally sharing and reevaluating what they have learned You can see an example of the classroom materials here https://bit.ly/intro_extro_demo I believe that the skills and abilities teachers can help students develop through the use of these materials are ones that are sadly lacking not only in the English language classroom but also in the general education of many students around the world Through the use of these materials I hope teachers can develop more actively and intellectually critical students who approach digital media with the ability not only to comprehend and consume information but also understand the possible bias motivation and underlying values of those creating the information I believe these skills and abilities are key to creating a more tolerant open minded and critically aware global society
