Kevin Zhou,2015-12-11

This book describes the technical problems and solutions for automatically recognizing and parsing a medical image into multiple objects structures or anatomies It gives all the key methods including state of the art approaches based on machine learning for recognizing or detecting parsing or segmenting a cohort of anatomical structures from a medical image Written by top experts in Medical Imaging this book is ideal for university researchers and industry practitioners in medical imaging who want a complete reference on key methods algorithms and applications in medical image recognition segmentation and parsing of multiple objects Learn Research challenges and problems in medical image recognition segmentation and parsing of multiple objects Methods and theories for medical image recognition segmentation and parsing of multiple objects Efficient and effective machine learning solutions based on big datasets Selected applications of medical image parsing using proven algorithms Provides a comprehensive overview of state of the art research on medical image recognition segmentation and parsing of multiple objects Presents efficient and effective approaches based on machine learning paradigms to leverage the anatomical context in the medical images best exemplified by large datasets Includes algorithms for recognizing and parsing of known anatomies for practical applications **Image-guided Radiation Therapy** Arno J. Mundt,John C. Roeske,2010-12-31

Image Guided Radiation Therapy IGRT is a true revolution in the field of radiation oncology IGRT provides the unprecedented means of conforming dose to the shape of the target tissues in 3 dimensions reducing the risk of complications thereby improving the quality of life of irradiated patients Moreover IGRT provides the means to deliver higher than conventional doses thus improving the chance of cure in these patients Despite its established

benefits several barriers exist to the widespread clinical implementation of IGRT In the past great concerns existed regarding the large capital outlay needed for both software and hardware This barrier is less relevant today given the increased reimbursements possible with IGRT Today the most significant barrier is education IGRT is a fundamentally new approach to both treatment planning and delivery Adoption of the IGRT approach entails new ways of thinking in regard to patient selection treatment planning and quality assurance measures Unfortunately apart from a few University based short courses limited resources are available for the physician and physicist interested in learning IGRT
