[ECKM 2015 Proceedings of the 16th European Conference on Knowledge Management](#) Juan Gabriel Cegarra, 2012      *ECKM 2012-Proceedings of the 13th European Conference on Knowledge Management* Juan Gabriel Cegarra, 2012      *A History of Management Accounting* Trevor Boyns, J. R. Edwards, 2013 There is growing interest in the history of accounting amongst both accounting practitioners and accounting academics This interest developed steadily from about 1970 and really took off in the 1990s However there is a lack of texts dealing with major aspects of accounting history that can be used in classrooms to inform new researchers and to provide a source of reference

for established researchers The great deal of research into cost and management accounting in Britain published in academic journals over the last twenty years including the authors own contributions makes The History of Cost and Management Accounting an essential contribution to the field Handbook of Management Accounting Research Christopher S. Chapman, Anthony G. Hopwood, Michael D. Shields, 2011-09-14 Volume two of the Handbooks of Management Accounting Research consists of two groups of chapters The first draw together research that has focussed on particular management accounting practices The second set synthesise contributions to the literature that have been focussed within particular organisational contexts Volume two concludes with a review of research on how management accounting practice and research varies around the world Special pricing available if purchased as a set with Volume 1 Documents the scholarly management accounting literature Publishing both in print and online through Science Direct International in scope

**Implementing reforms in public sector accounting** Susana Jorge, 2008-07-01 Over the life of the Comparative International Governmental Accounting Research CIGAR network there has been unprecedented global interest in public sector accounting reforms Hence the importance given to taking stock of reforms implementation This book gathers a set of papers many of them in comparative international perspective on several topics relating to Public Sector Accounting both at Central and Local Government levels Authors from several countries around the world present and discuss here issues such as financial reporting information users and accountability performance measurement and management accounting national and international standards reform processes budgeting auditing and controlling systems efficiency and service charters contingent liabilities and consolidated accounts Several of these are also analysed within the context of developing countries Subsequently the book offers a compilation of the most important topics actually being discussed in the Public Sector Accounting field *Risk Behaviour and Risk Management in Business Life* Bo Green, 2013-03-09 Risk behaviour and risk management in business life influence a wide range of fields in which only a very limited amount of research has been undertaken These topics have often been treated as if they were theoretically and practically isolated from other fields the so called risk archipelago problem What is actually needed is another focus in which the problem of risk is treated as a central theme The demand for interdisciplinary research means that there is a need for crossing scientific boundaries In approaching risk problems from a holistic perspective there is also a parallel need for linking the scientific and the business worlds Researchers must work closely together in concrete multidisciplinary research projects and in co operation with the industrial world in seeking out and solving research problems of importance This book contains selected and re written papers and key note speeches presented in a risk seminar that Stockholm University organised in June 1997 The seminar in which 200 researchers and practitioners from 26 countries participated was divided into four main topic areas Risk Assessment and Credit Management Psychology in Business Life Risk Management in Small Firms and Law and Business Risk In writing this book the editor invited eight professors from four continents to assist him in introducing the reader to the

different and scientific disciplines and in explaining the need for interdisciplinary multidisciplinary and cross disciplinary risk research projects The book consists of eight chapters and the target groups are researchers doctoral and master students at universities and business people working in the risk management area **Financial Management** ,2005 **Budgeting -**
