[Business Ethics: Perspectives, Management and Issues](#) Cam Caldwell,2020-10 Recent evidence readily confirms that ethical conduct in human interaction has declined in the context of business but also in virtually every phase of life An alarming number of government leaders at all levels have demonstrated by their conduct that their primary goal is the pursuit of self interest for themselves their party and their constituents regardless of whether the choices they make are in the long term best interests of those whom they are obligated to serve Academic institutions and their leaders similarly seem to be either tied to past assumptions and traditions that seem or blatantly out of touch with the needs of their students and the communities that they serve Increasingly college and university academic programs are being taught by part time and temporary faculty who are paid less than their elementary and high school counterparts who lack their educational preparation level of knowledge or responsibility in preparing students for their chosen careers Non governmental

organizations also struggle to earn the respect of the public and their trustworthiness has been called into question as chief executive officers and staff receive high salaries but lack accountability for achieving results or acting with integrity Those who work in the media are as a group no longer trusted to provide an objective and unbiased assessment of the news Even religious institutions are under attack and their leaders are being asked to be accountable to the standards which their doctrines advocate Implicit in ethical conduct is the responsibility to identify the far goals of human achievement rather than short term interests that undermine long term value creation and outcomes that best serve society Abraham Maslow has wisely noted that the pursuit of efficiency must be evaluated in terms of the specific goals intended to be achieved but the ramifications of individual and collective actions often seem to be out of focus misdirected and short sighted The purpose of this book is to identify key ethics related issues facing individuals and organizations in the 21st century and to offer recommendations and encouragement to those who choose to raise the bar for their standards of conduct This volume combines established thinking about ethics and morality with new insights and ethical perspectives that have never before been addressed by traditional business ethics The authors are comfortable in challenging the status quo and failures of so many leaders and organizations who have been unable to earn the trust of the general public In criticizing the failures of institutions and their leaders this book is also a plea to those who lead to rethink the standards and criteria which they have adopted about duties that they owe to others Many of the insights contained within this book invite readers to begin from within themselves by examining their identities and their assumptions about their ethical beliefs The evidence about personal ethical standards suggest that individuals rarely make conscious decisions regarding their own actions and fall into patterns that they later acknowledge to be questionable and less than ideal This book challenges the way that leaders make decisions about moral conduct and asks those who read this book to reassess the impacts of the choices that they make Finally this volume encourages readers to discover the best version of themselves Only when people strive to achieve their highest potential are those individuals likely to optimally benefit others and create a better world Ultimately ethics is about each person s responsibility to constantly improve and to help others along the way We trust that this book will challenge the thinking of its readers that it will become the source of dialogue and even possible disagreement about duties and obligations Our intention is that this book will ultimately inspire individuals to think more clearly about the way that they interact with others and how they can best fulfill their highest purpose in life

Cutting-edge Issues in Business Ethics Mollie

Painter-Morland, Patricia Werhane, 2008-07-22 Business ethics originated in the United States as an offshoot of theoretical ethics and as part of a movement in applied ethics that was initiated with medical ethics. Although a few small religious based colleges and universities offered courses in business ethics just after the Second World War, business ethics as an academic field developed most seriously in many universities in the early 1970s. The field of medical ethics was well developed by then and it was a natural step to think about ethical issues in business as well. There was also a public reaction to a number of corporate scandals e.g. pricing the Lockheed Japanese bribery allegations, the Goodyear airbrake scandal etc that encouraged universities to begin teaching the subject. Business ethics as an academic field was originally developed by philosophers most of whom had come out of the analytic or Anglo American philosophical traditions and who had been trained in classical ethics on Aristotle, Kant, Mill, Bentham and perhaps Dewey. The resulting field then has been dominated by this thinking. Although to date there are over 50 textbooks in business ethics, most textbooks in business ethics do not take into account contemporary continental philosophy. Although Marxism is sometimes taught in these courses, other more contemporary continental thinkers who could contribute substantially to the field have been ignored. This phenomenon is reiterated in the professional journals and in theoretical books on the topic.

Business Ethics Christoph Lütge, 2021 In a globalized world, business ethics continues to gain importance as a field of study. Using a novel approach that centres on economic theory and analysis, this book provides students with a comprehensive overview of the essential concepts of business ethics related to both the economy as a whole and corporate ethics of the individual company.
