Problems and Solutions to Accompany Chang's Physical Chemistry for the Chemical and Biological Sciences

Helen O. Leung, Mark D. Marshall, 2000-08-11 This Solutions Manual to accompany Raymond Chang's Physical Chemistry for the Chemical and Biological Sciences restates each of the 1020 innovative chapter ending problems in the text followed by a detailed solution. Each solution is approached with the same conversational style that the authors use in their own classrooms as they try to teach solutions to the problems rather than simply giving out answers. One hundred forty three figures and diagrams are used to illustrate the solutions. Both authors are recent recipients of the Henry Dreyfus Teacher Scholar award and bring to the manual effective pedagogy as well as the vitality of modern physical chemistry. *Problems and Solutions to Accompany Chang's Physical Chemistry for the Biosciences* Mark Marshall, Helen Leung, 2005-05-20 Perhaps nothing can better help students understand difficult concepts than working through and solving problems. By providing a strong pedagogical framework for self study this Solutions Manual will give students fresh insights into concepts and principles that may elude them in the lecture hall. It features detailed solutions to each of the even numbered problems from Raymond Chang's Physical Chemistry for the Biosciences. The authors approach each solution with the same conversational style that they use in their classrooms as they teach students problem solving techniques rather than simply handing out answers. Illustrative figures and diagrams are used throughout.
