Flowering Plants Armen Takhtajan, 2009-07-06 Armen Takhtajan is among the greatest authorities in the world on the evolution of plants. This book culminates almost sixty years of the scientist's research of the origin and classification of the flowering plants. It presents a continuation of Dr. Takhtajan's earlier publications, including *Systema Magnoliophytorum* (1987, in Russian) and *Diversity and Classification of Flowering Plants* (1997, in English). In his latest book, the author presents a concise and significantly revised system of plant classification, the Takhtajan system, based on the most recent studies in plant morphology, embryology, phytochemistry, cytology, molecular biology, and palynology. Flowering plants are divided into two classes: class Magnoliopsida or Dicotyledons, which includes 8 subclasses, 126 orders, c. 440 families, almost 10,500 genera, and no less than 195,000 species; and class Liliopsida or Monocotyledons, which includes 4 subclasses, 31 orders, 120 families, more than 3,000 genera, and about 65,000 species. This book contains a detailed description of plant orders and descriptive keys to plant families, providing characteristic features of the families and their differences. **Phytochemistry and Plant Taxonomy** K. Invasive Alien Plants J. R. Bhatt, 2012 Invasive alien species are a major threat to biodiversity and ecosystems throughout the world. In India, a country with four of the world's most important biodiversity hotspots, the invasion of alien plants means risking a national ecological disaster with major social and economic consequences. Currently, there is insufficient information about invasive alien plants, their distribution, rate of spread, and adaptability to new environments. This book reveals existing and potential invaders, evaluates the level of risk they pose to native species, and suggests steps to manage spread and limit damage. Invaluable to policy makers, this book is also required reading for researchers of invasive plants worldwide. **Centres of Plant Diversity: Asia, Australasia, and the Pacific** Stephen D.
