Preparation Of Activated Carbon Using The Copyrolysis Of:

Activated Carbon Jude Okolie, Alivia Mukherjee, 2025-05-08 *Activated Carbon Synthesis Analysis and Industrial Applications* explores the fundamentals of activated carbon production and characterization modification techniques and applications of machine learning in the field of activated carbon synthesis and applications The book is divided into three parts to enable readers and researchers of all levels easy access to the information herein Part 1 is on Synthesis methods and characterization techniques The next six chapters on part 2 focus on diverse industrial applications of activated carbon The last section is on machine learning applications as well as research progress in activated carbon synthesis modification and diverse applications Written for researchers graduate and undergraduate students academics and industry professionals in the fields of sustainable environmental science and chemical engineering this book will be a welcomed reference for those who wish to better understand the role of activated carbon in solving sustainability challenges in the world related to energy shortage greenhouse gas emissions and environmental issues Offers useful information for industrial practitioners interested in the development of new biobased technology Opens up new research directions by listing knowledge gaps and future research prospects of activated carbon utilization

Sustainable Technologies for Textile Wastewater Treatments

Subramanian Senthilkannan Muthu, 2021-03-23 *Sustainable Technologies for Textile Wastewater Treatments* takes on this complex and environmentally crucial issue by providing comprehensive coverage on new technologies and practices Sections provide technical detail and instruction on cutting edge technologies including innovative industrial uses of nanotechnology and waste biomass In addition case studies are provided on different textile wastewater treatment plants hence showing their full practical context Specific areas of discussion include zero liquid discharge nanomaterials adsorption and advanced oxidization processes AOP Appropriate case studies from textile wastewater treatment plants are included to help illustrate key points Other sections cover the cost of these methods before highlighting effective low cost options This book will be of use to researchers with an interest in textile sustainability or wastewater treatment although sustainability managers or lifecycle assessment professionals in the textiles and fashion sector will find the book very impactful to their work Provides detailed technical information on wastewater remediation methods including zero liquid discharge nanomaterials adsorption and advanced oxidization processes AOP Includes case studies from textile wastewater treatment plants Outlines the cost of these methods and highlights effective low cost options

Production of Biofuels and Chemicals from Sustainable Recycling of Organic Solid Waste

Zhen Fang, Richard L. Smith Jr., Lujiang Xu, 2022-05-18 This book covers sustainable recycling processes e g physical biological chemical and thermo chemical of multiple organic solid wastes provides methods for material recycle of wastes into value added products including fuels and commodity chemicals that are able to be directly applied to promote manufacturing processes Aimed at improving the awareness of effective conversion protocols and for developing innovative biomass conversion processes this text was conceived as a collection of studies on state of art

techniques and know how for production of biofuels and chemicals from sustainable recycling of organic solid wastes Topics in the text are discussed in terms of addressing recent advances assessing and highlighting promising new methods or new technological strategies and direct conversion of organic solid wastes to process feeds Highly recognized authorities experts and professionals have contributed individual chapters in selected areas to cover the overall topic in a comprehensive manner

Biorefinery: A Sustainable Approach for the Production of Biomaterials, Biochemicals and Biofuels

Pranav D. Pathak, Sachin A. Mandavgane, 2023-03-01 This book discusses recent trends and concepts in the field of biorefinery It discusses optimal and economic strategies for converting biomass to value added products to maximize profits with minimal environmental impact with a sustainability approach The chapters of the book are focused on the current technologies techno economical aspects life cycle assessment and case studies The book is divided into three sections the first section presents strategies for the production of biofuels like bioethanol biomethane biohydrogen bio oil gasification etc from the biomass in a sustainable way The second sections review the extraction of bioactive chemicals phenolic antioxidants enzymes and carboxylic acid from the biomass residue The last section examines the utilization of biomass for the production of bioactive materials including biofertilizers bioadsorbents activated carbon nano materials and pigments This book explores the relation between biofuels and the sustainable development goals SDGs 7

Engineered Biochar Sudipta Ramola, Dinesh

Mohan, Ondrej Masek, Ana Méndez, Toshiki Tsubota, 2022-08-09 This book systematically covers the fundamentals and applications of modified biochar The 19 chapters are divided into 3 sections that provide a holistic overview for researchers from all related fields Section 1 and 2 present the pyrolysis process including the advantages and limitations of the physical chemical and biological modification methods and characterization of modified biochar Section 3 highlights the wide spectrum of applications of modified biochar in fuel cells and batteries remediation of organic and inorganic contaminants from soil and water and soil fertilization Given its scope the book appeals to a broad readership in various fields of chemical engineering materials science and environmental science
