The Botany Of Desire:

The Botany of Desire Michael Pollan, 2001-06-12 The book that helped make Michael Pollan the New York Times bestselling author of *Cooked* and *The Omnivore's Dilemma* one of the most trusted food experts in America In 1637 one Dutchman paid as much for a single tulip bulb as the going price of a town house in Amsterdam Three and a half centuries later Amsterdam is once again the mecca for people who care passionately about one particular plant though this time the obsessions revolves around the intoxicating effects of marijuana rather than the visual beauty of the tulip How could flowers of all things become such objects of desire that they can drive men to financial ruin In *The Botany of Desire* Michael Pollan argues that the answer lies at the heart of the intimately reciprocal relationship between people and plants In telling the stories of four familiar plant species that are deeply woven into the fabric of our lives Pollan illustrates how they evolved to satisfy humankind's most basic yearnings and by doing so made themselves indispensable For just as we've benefited from these plants the plants in the grand co evolutionary scheme that Pollan evokes so brilliantly have done well by us The sweetness of apples for example induced the early Americans to spread the species giving the tree a whole new continent in which to blossom So who is really domesticating whom Weaving fascinating anecdotes and accessible science into gorgeous prose Pollan takes us on an absorbing journey that will change the way we think about our place in nature *The Botany of Desire Young Readers Edition* Michael Pollan, 2023-05-09 By the bestselling author of *The Omnivore's Dilemma* this is Michael Pollan's ingenious companion book about the surprising and close relationship between people and plants In this entertaining young readers edition of the environmental studies classic Michael Pollan demonstrates how people and domesticated plants have formed a reciprocal relationship He links four fundamental human desires sweetness beauty energy and control with the plants that satisfy them the apple the tulip coffee and the potato In telling the stories of four familiar species Pollan illustrates how the plants have evolved to satisfy humankind's most basic yearnings And just as we've benefited from these plants we have also helped them to thrive

Orion, 2001 **The New Humanities Reader** Richard Earl Miller, Kurt Spellmeyer, 2005

The **The New Humanities Reader** presents 32 challenging and important essays from diverse fields that address current global issues. The authors contend that there is a crisis within the humanities today due to specialization within narrow fields of scholarship resulting in a higher education system that produces students who lack the general cross-disciplinary knowledge needed to better understand today's complex world. The selections encourage students to synthesize and think critically about ideas and research formerly kept apart. This approach challenges readers to resist mimetic thinking and instead creatively connect ideas to help them understand and retain what they read. Through this process of reading, discussing, and writing, students develop the analytical skills necessary to become informed citizens. Focused on today's issues, the selections represent both well-known nonfiction authors and newly published writers and are drawn from such periodicals as *The New Yorker* and *Natural History* and from best-selling books including *Reading Lolita in Tehran*, *Fast Food Nation*, and *Into the Wild*. Students will be engaged by reading and rereading, analyzing, and working with these selections not simply because they are models of good writing but because they are also deeply thought-provoking pieces that invite readers to respond.

The New Humanities Reader Richard E. Miller, Kurt Spellmeyer, 2003

Designed to help students attain the analytical skills and big picture overview necessary to become informed citizens, the collection contains challenging and important readings from diverse fields that address critical issues in contemporary society. Ideas and research from wide-ranging sources provide opportunities for students to synthesize materials and come up with their own ideas and solutions. Students will be engaged by reading and rereading, analyzing, and working with these selections because they present powerful ideas not simply because they are models of good writing style.
