

# UNIT 1: WHAT IS HUMAN RESOURCE MANAGEMENT?

## Human Resource management past and present

- HRM was called personnel administration or personnel management
  - Because it was mainly concerned with administrative tasks of managing an organisation
    - Record keeping and dealing with employee wages, salaries and benefits
- 1. Scientific management
  - 100 years ago, people working in manufacturing industry
    - Worked long hours in dirty factories with no fresh air
  - Production played an important during that time
    - Employees were watched by supervisors
    - Employees were told they would lose their jobs if they did not produce a certain amount of goods in the time allowed
  - The scientific approach – is a way of studying jobs to see how much can be done in a certain time
    - It was used to find out how workers could be productive and efficient
  - Time and motion process
  - All employees earned the same weekly wage, even if they did different jobs and produced more products
    - The piece-rate system was introduced to encourage workers to work harder
    - Workers were paid according to the amount they produced and received more money for every product they produced above the performance standard
  - Problems with the scientific approach:
    - Workers were treated as people who were only interested in money
    - Work methods were concerned only with what workers could produce
    - It did not focus on workers and their job satisfaction
    - Workers were kept to a routine and were not encourage to use their minds
