Construction History are well reflected in the papers of the present conference Construction History has strong roots in the

historiography of the 19th century and the evolution of industrialization but the focus of our research field has meanwhile

shifted notably to include more recent and also more distant histories as well This is reflected in these conference

proceedings where 65 out of 148 contributed papers deal with the built heritage or building actors of the 20th or 21st

century The conference also mirrors the wide spectrum of documentary and analytical approaches comprised within the

discipline of Construction History Papers dealing with the technical and functional analysis of specific buildings or building

types are complemented by other studies focusing on the lives and formation of building actors from laborers to architects

and engineers from economical aspects to social and political implications on legal aspects and the strong ties between the

history of construction and the history of engineering sciences The conference integrates perfectly into the daily work at the

Institute for Preservation and Construction History at ETH Zurich Its two chairs the Chair for Building Archaeology and

Construction History and the Chair for Construction Heritage and Preservation endeavor to cover the entire field and to

bridge the gaps between the different approaches methodologies and disciplines between various centuries as well as

technologies learning together and from each other The proceedings of 8ICCH give a representative picture of the state of
