Congratulations! You have chosen a GEMEL car alarm, a truly outstanding product. Please take the time to read this manual as it is indispensable. Locate the system, that is hi-lighted on the cover, in the chart on page 1. On the left of the chart is the function column numbered 1 to 25. The stars under your alarm indicate the section numbers you need to refer to learn about the features associated with that system.

⊗   *Function to be selected at the time of installation.*
In the Belgium version these functions are masked and cannot be changed.
⚠   *The alarm can be integrated with additional modules, i.e. Shock sensor (GMS), Anti-Tilt (GMA), Window lift, Ultrasonic & Bi-volumetric modules (this function is already included in GR48) and Engine immobiliser (This function is already included the ND5, ND6, and GR48).*

1)   ROLLING CODE TRANSMITTERS

Today's technology has enabled these alarms to be manufactured with a rolling code system. The codes are changed randomly every time the ON/OFF button is pressed. This guarantees the highest level of security available against any attempt to scan or grab the activating code. It is possible to have up to a maximum of 4 transmitters programmed to the system at any one time. Each time the ignition switch is turned OFF the alarm LED will flash once for each transmitter programmed.
In the event of a transmitter being lost or stolen, the remaining transmitter/s can be reprogrammed to the alarm thus cancelling the lost/stolen transmitter.
If a transmitter appears to be working but does not activate/de-activate the alarm, refer to the RE-SYNCHRONISATION section.
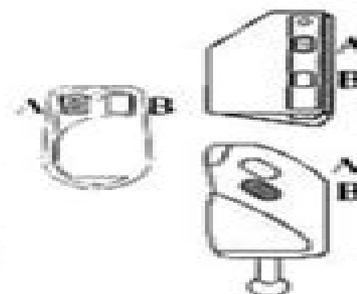

2)   ARMING THROUGH REMOTE CONTROL

Press push-button (A).
The alarm arming will be signalled by:
-   2 flashes of direction lights facility;
-   2 audible tones; ⊗ (With GR 48 version only with GS3A98 siren)
-   Doors will lock (if this function is connected);
-   Windows will close, (when connected), by keeping the push-button pressed up to the wished position); ⊗
-   Illumination of the alarm LED. After 45 seconds it will start to flash.
NB During the 45 seconds arming period, triggering any of the alarm lines will be signalled by a single audible tone (with GR48 version only with GS3A98 siren) and a short extinction of the dashboard LED.

3)   OPTIONAL MODULE EXCLUSION (ND5, ND6, ND14) ⚠

Arm the alarm system and then press push-button (B).
If this operation is carried out within 45seconds from the arming, all the installed optional sensor modules are excluded.
The exclusion will be signalled by:
-   3 buzzer sounds; ⊗
-   3 flashing lights of direction lights facility;
-   3 flashes of the LED.

4)   U.S., SHOCKS AND ANTI-TILT OPTIONAL MODULES EXCLUSION (Only for GR48) ⚠

The ultrasonics and optional modules can only be excluded during the first 45 seconds from the alarm arming, this can be done by one of two separate actions. Arm the alarm system and press the push-button (B). The ultrasonics are excluded when pressing the push-button for the first time.
The exclusion will be signalled by:
-   3 buzzer sounds; ⊗ (Only with GS3A98 siren)
-   3 flashes of the direction lights facility;
-   3 flashes of the dashboard LED.
By pressing the (B) push-button again, you will exclude any remaining optional modules. The alarm confirms this exclusion, by repeating the above signals.
