**Readings in Machine Learning** Jude W. Shavlik, Thomas Glen Dietterich, 1990 The ability to learn is a fundamental characteristic of intelligent behavior Consequently machine learning has been a focus of artificial intelligence since the beginnings of AI in the 1950s The 1980s saw tremendous growth in the field and this growth promises to continue with valuable contributions to science engineering and business Readings in Machine Learning collects the best of the published machine learning literature including papers that address a wide range of learning tasks and that introduce a variety of techniques for giving machines the ability to learn The editors in cooperation with a group of expert referees have chosen important papers that empirically study theoretically analyze or psychologically justify machine learning algorithms The papers are grouped into a dozen categories each of which is introduced by the editors

**Diverse Perspectives and State-of-the-Art Approaches to the Utilization of Data-Driven Clinical Decision Support Systems**

Connolly, Thomas M., Papadopoulos, Petros, Soflano, Mario, 2022-11-11 The medical domain is home to many critical challenges that stand to be overcome with the use of data driven clinical decision support systems CDSS and there is a growing set of examples of automated diagnosis prognosis drug design and testing However the current state of AI in medicine has been summarized as high on promise and relatively low on data and proof If such problems can be addressed a data driven approach will be very important to the future of CDSSs as it simplifies the knowledge acquisition and maintenance process a process that is time consuming and requires considerable human effort Diverse Perspectives and State of the Art Approaches to the Utilization of Data Driven Clinical Decision Support Systems critically reflects on the challenges that data driven CDSSs must address to become mainstream healthcare systems rather than a small set of exemplars of what might be possible It further identifies evidence based successful data driven CDSSs Covering topics such as automated planning diagnostic systems and explainable artificial intelligence this premier reference source is an excellent resource for medical professionals healthcare administrators IT managers pharmacists students and faculty of higher education librarians researchers and academicians Artificial Life V Christopher G.
