Packages provides information on packaging which is one of the most technologically intensive activities in the electronics
industry The electronics packaging community has realized that while semiconductor devices continue to be improved upon
for performance cost and reliability it is the interconnection or packaging of these devices that will limit the performance of
the systems Technology must develop packaging for transistor chips with high levels of performance and integration
providing cooling power and interconnection and yet preserve the performance of the semiconductors with minimum
package delay to the system Trends in each of the major packaging technologies include chip level connection providing the
required connections between the chip and the semiconductor package The power distribution to the chip and heat removal
from the chip first level packages providing all the necessary wiring interconnections and power distribution first to second
level interconnections and second level packages providing all the necessary wiring connections power distribution and
power supply connection are included as well This book is a useful and informative reference to students or individuals
