Perspectives from the European Language Portfolio Bärbel Kühn, María Luisa Pérez Cavana, 2012-05-31 Using constructivist principles and autonomous learning techniques the ELP has pioneered innovative and cutting edge approaches to learning languages that can be applied to learning across the spectrum Although articles on the success of the ELP project have appeared in some academic journals Perspectives from the European Language Portfolio is the first book to report on and contextualise the

project's innovative techniques for a wider educational research audience. During the last ten years the ELP has increasingly become a reference tool for language learning and teaching in primary, secondary and tertiary educational settings all around Europe. The editors of this volume believe that there is a need to reflect on the significant contribution that the ELP has delivered for language learning and teaching and to critically evaluate its achievements. This volume offers a range of investigations from theoretical studies to practical cases around these issues and includes relevant contributions of the ELP to language pedagogy, assessing the impact of the ELP on pedagogical research and practice, exploring and defining pathways for future developments.

Reflective Learning This book is intended for a readership of language teachers and researchers across Europe. It will be of particular relevance to those engaged in language learning and teaching within the Common European Framework of Reference supporting independent learning and developing a language curriculum, whether in school, adult, further or higher education.

Exploring Modern Greek as a Second, Foreign, and Heritage Language Marina Mattheoudakis, Christina Maligkoudi, 2024-09-10. Exploring Modern Greek as a Second Foreign and Heritage Language considers the diverse educational contexts within which Modern Greek is taught and how these diverse contexts substantially alter the requirements for materials, teacher training and instructional practices. Divided into three parts, this book systematically examines the teaching of Greek as a second, foreign and heritage language for students in Greece and further afield. The methodologies vary from interviews to case studies and introduce innovative approaches such as experiential learning, creative writing and theatrical practices designed to create a more holistic learning experience. The in-depth studies provided in this collection are designed to raise awareness of the unique challenges and different needs arising in the Greek language classroom and the implications for teachers and learners. This book will be essential reading for educators, researchers and policy makers interested in the teaching of Greek as a second, foreign or heritage language.

Narratives and Practices of Migrant and Minority Incorporation in European Societies Zenia Hellgren, Alexander Gamst Page, Thomas Sealy, 2025-02-20. This book explores the disjuncture that emerges at various levels in European diversity management policies and their translation into practice. It shows that state-wide strategies can only guide diversification outcomes, not wholly control them, and in practice national-level integration policies rely on multi-level involvement including authorities at regional or local levels and civil society organisations. The book demonstrates a complex and varied picture of the ways in which different European countries engage with ethnic diversity, as well as to the internal inconsistency of the philosophical underpinnings of this engagement. As such, it draws attention not just to ways in which diversity is done but illuminates processes and narratives which are messy, contested and contradictory. This book is of key interest to scholars, students and practitioners involved in integration, ethnic and cultural diversity studies, migration and immigration, citizenship, ethnicity and more broadly to European studies and the wider social sciences.
