## **The Structure Of Evolutionary Theory Stephen Jay Gould:**

**The Structure of Evolutionary Theory** Stephen Jay Gould, 2002-03-21 The world's most revered and eloquent interpreter of evolutionary ideas offers here a work of explanatory force unprecedented in our time a landmark publication both for its historical sweep and for its scientific vision With characteristic attention to detail Stephen Jay Gould first describes the content and discusses the history and origins of the three core commitments of classical Darwinism that natural selection works on organisms not genes or species that it is almost exclusively the mechanism of adaptive evolutionary change and that these changes are incremental not drastic Next he examines the three critiques that currently challenge this classic Darwinian edifice that selection operates on multiple levels from the gene to the group that evolution proceeds by a variety of mechanisms not just natural selection and that causes operating at broader scales including catastrophes have figured prominently in the course of evolution Then in a stunning tour de force that will likely stimulate discussion and debate for decades Gould proposes his own system for integrating these classical commitments and contemporary critiques into a new structure of evolutionary thought In 2001 the Library of Congress named Stephen Jay Gould one of America's eighty three Living Legends people who embody the quintessentially American ideal of individual creativity conviction dedication and exuberance Each of these qualities finds full expression in this peerless work the likes of which the scientific world has not seen and may not see again for well over a century *The Richness of Life* Stephen Jay Gould, 2007 This spotlight on an extraordinary mind collects the most entertaining and enlightening writings by the beloved paleontologist evolutionary biologist and celebrant of the wonder of life 20 illustrations *Why Gould Was Wrong* Nils K. Oeijord, 2003 Stephen Jay Gould 1941-2002 was a leading critic of human behavioral genetics human sociobiology evolutionary psychology and the modern evolutionary synthesis *Why Gould Was Wrong* explains why Gould's claims were horribly wrong [I Have Landed](#) Stephen Jay Gould, 2011-10 Gould's final essay collection is based on his remarkable series for *Natural History* magazine exactly 300 consecutive essays with never a month missed published from 1974 to 2001 Both an intellectually thrilling journey into the nature of scientific discovery and the most personal book he ever published

**Full House** Stephen Jay Gould, 2011-10 Gould shows why a more accurate way of understanding our world is to look at a given subject within its own context to see it as a part of a spectrum of variation and then to reconceptualize trends as expansion or contraction of this full house of variation and not as the progress or degeneration of an average value or single thing **Reading Richard Dawkins** Gary Keogh, 2014 Theological reactions to the rise of the new atheist movement have largely been critically hostile or defensively deployed apologetics to shore up the faith against attack Gary Keogh contends that focusing on scholarly material that is inherently agreeable to theology will not suffice in the context of modern academia Theology needs to test its boundaries and venture into dialogue with those with antithetical positions Engaging Richard Dawkins as the embodiment of such a position illustrates how such dialogue may offer new perspectives on classical

theological problems such as the relationship of science and religion the existence of God creation natural suffering and theodicy Keogh demonstrates how a dialogical paradigm may take shape rather than merely discussing it as a theoretical framework A dialogue between such opposing hermeneutics may provide a new paradigm of theological scholarship one which is up to the task of facing its critics in the public and pluralistic context of modern academia *Full House* Stephen Jay Gould,1996-09-01 Few would question the truism that humankind is the crowning achievement of evolution that the defining thrust of life s history yields progress over time from the primitive and simple to the more advanced and complex that the disappearance of 400 hitting in baseball is a fact to be bemoaned or that identifying an existing trend can be helpful in making important life decisions Few that is except Stephen Jay Gould who in his new book *Full House The Spread of Excellence from Plato to Darwin* proves that all of these intuitive truths are in fact wrong All of these mistaken beliefs arise out of the same analytical flaw in our reasoning our Platonic tendency to reduce a broad spectrum to a single pinpointed essence says Gould This way of thinking allows us to confirm our most ingrained biases that humans are the supreme being on this planet that all things are inherently driven to become more complex and that almost any subject can be expressed and understood in terms of an average In *Full House* Gould shows why a more accurate way of understanding our world and the history of life is to look at a given subject within its own context to see it as a part of a spectrum of variation rather than as an isolated thing and then to reconceptualize trends as expansion or contraction of this full house of variation and not as the progress or degeneration of an average value or single thing When approached in such a way the disappearance of 400 hitting becomes a cause for celebration signaling not a decline in greatness but instead an improvement in the overall level of play in baseball trends become subject to suspicion and too often only a tool of those seeking to advance a particular agenda and the Age of Man a claim rooted in hubris not in fact more accurately becomes the Age of Bacteria The traditional mode of thinking has led us to draw many conclusions that don t make satisfying sense says Gould It tells us that 400 hitting has disappeared because batters have gotten worse but how can that be true when record performances have improved in almost any athletic activity In a personal eureka Gould realized that we were looking at the picture backward and that a simple conceptual inversion would resolve a number of the paradoxes of the conventional view While *Full House* deftly reveals the shortcomings of the popular reasoning we apply to everyday life situations Gould also explores his beloved realm of natural history as well Whether debunking the myth of the successful evolution of the horse he grants that the story still deserves distinction but as the icon of evolutionary failure presenting evidence that the vaunted progress of life is really random motion away from simple beginnings not directed impetus toward complexity or relegating the kingdoms of Animalia and Plantae to their proper positions on the genealogical chart for all of life as mere twigs on one of the three bushes *Full House* asks nothing less than that we reconceptualize our view of life in a fundamental way From the Hardcover edition **Eight Little Piggies: Reflections in Natural History** Stephen Jay Gould,2010-11-29 There is no scientist today whose books I

look forward to reading with greater anticipation of enjoyment and enlightenment than Stephen Jay Gould Martin Gardner Among scientists who write no one illuminates as well as Stephen Jay Gould does the wonderful workings of the natural world Now in a new volume of collected essays his sixth since Ever Since Darwin Gould speaks of the importance of unbroken connections within our own lives and to our ancestral generations Along with way he opens to us the mysteries of fish tails frog calls and other matters and shows once and for all why we must take notice when a seemingly insignificant creature is threatened like the land snail Partula from Moorea whose extinction he movingly relates **Questioning the Millennium** Stephen Jay Gould, 2011-10 Gould addresses three questions about the millennium with his typical erudition warmth and whimsy What is the concept of a millennium and how has its meaning shifted over time How did the projection of Christ's 1 000 year reign become a secular measure And when exactly does the millennium begin January 1 2000 or January 2 2001

**The Book of Life** Stephen Jay Gould, The Alexander Agassiz Professor of Zoology Stephen Jay Gould, 1994-08-01 The latest research and paintings prepared especially for this book highlight a new edition of the story of life on earth The Book of Life explains how mammals after surviving the impact of a massive comet inherited the earth and explains chains of animal survival causes and consequences of adaptation and more The Book of Life, 2001 **Leonardo's Mountain of Clams**

**and the Diet of Worms** Stephen Jay Gould, 2011-10 This unique volume of 21 recent essays published in Natural History magazine consciously formulates a humanistic natural history telling how humans have learned to study and understand nature rather than a history of nature itself 41 illustrations *Ever Since Darwin* Stephen Jay Gould, 1991 Ever Since Darwin Stephen Jay Gould's first book has sold more than a quarter of a million copies Like all succeeding collections by this unique writer it brings the art of the scientific essay to unparalleled heights *The Cold War U.S. Army* Ingo Tauschweizer, 2008 Focuses on the Seventh Army in West Germany the largest and best prepared field army ever deployed by the U S in peacetime to show how the U S army redefined its identity structure and mission in order to avoid obsolescence during the Cold War era of nuclear weapons and air power *The Flamingo's Smile: Reflections in Natural History* Stephen Jay Gould, 2010-11-29 Gould himself is a rare and wonderful animal a member of the endangered species known as the ruby throated polymath He is a leading theorist on large scale patterns in evolution and one of the sharpest and most humane thinkers in the sciences David Quammen New York Times Book Review *An Urchin in the Storm* Stephen Jay Gould, 1988

Dinosaur in a Haystack Stephen Jay Gould, 1997 Essays discuss topics ranging from Charles Darwin to Old Testament Psalms from the dinosaurs of Jurassic Park to the ethical challenges of science **Ever Since Darwin** Stephen Jay Gould, 1980 Ever Since Darwin Stephen Jay Gould's first book has sold more than a quarter of a million copies Like all succeeding collections by this unique writer it brings the art of the scientific essay to unparalleled heights **History and Philosophy of the Life Sciences**, 2008 **Life's Grandeur** Stephen Jay Gould, 1996 In this tour de force of scientific and cultural insight Gould discusses the history of life of music sport and other human achievements in his search for the

meaning of excellence
