Development Report WDR features a topic of central importance to global development The 2018 WDR LEARNING to Realize
Education s Promise is the first ever devoted entirely to education And the time is right education has long been critical to
human welfare but it is even more so in a time of rapid economic and social change The best way to equip children and youth
for the future is to make their learning the center of all efforts to promote education The 2018 WDR explores four main
themes First education s promise education is a powerful instrument for eradicating poverty and promoting shared
prosperity but fulfilling its potential requires better policies both within and outside the education system Second the need to
shine a light on learning despite gains in access to education recent learning assessments reveal that many young people
around the world especially those who are poor or marginalized are leaving school unequipped with even the foundational
skills they need for life At the same time internationally comparable learning assessments show that skills in many middle
income countries lag far behind what those countries aspire to And too often these shortcomings are hidden so as a first step
to tackling this learning crisis it is essential to shine a light on it by assessing student learning better Third how to make
schools work for all learners research on areas such as brain science pedagogical innovations and school management has
identified interventions that promote learning by ensuring that learners are prepared teachers are both skilled and motivated

and other inputs support the teacher learner relationship Fourth how to make systems work for learning achieving learning throughout an education system requires more than just scaling up effective interventions Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress building coalitions for learning and taking an adaptive approach to reform
