**Programming Languages** Terrence W. Pratt, 1984 PROGRAMMING LANGUAGES: DESIGN AND IMPLEMENTATION Terrence W. Pratt, Marvin V. Zelkowitz, 1999 **Programming Languages: Design And Implementation 4Th Ed.** Pratt & Zelkowitz, Programming Languages: Principles and Paradigms Maurizio Gabbrielli, Simone Martini, 2010-03-23 This excellent addition to the UTiCS series of undergraduate textbooks provides a detailed and up to date description of the main principles behind the design and implementation of modern programming languages Rather than focusing on a specific language the book identifies the most important principles shared by large classes of languages To complete this general approach detailed descriptions of the main programming paradigms namely imperative object oriented functional and logic are given analysed in depth and compared This provides the basis for a critical understanding of most of the programming languages An historical viewpoint is also included discussing the evolution of programming languages and to provide a context for most of the constructs in use today The book concludes with two chapters which introduce basic notions of syntax semantics and computability to provide a completely rounded picture of what constitutes a programming language div Programming Languages: Concepts and Implementation Saverio Perugini, 2021-12-02 Programming Languages Concepts and Implementation teaches language concepts from two complementary perspectives implementation and paradigms It covers the implementation of concepts through the incremental construction of a progressive series of interpreters in Python and Racket Scheme for purposes of its combined simplicity and power and assessing the differences in the resulting languages **Programming Languages: Implementations, Logics, and Programs** S.Doaitse Swierstra, 1996-09-11 This book constitutes the refereed proceedings of the Eighth International Symposium on Programming Languages Implementations Logics and Programs PLILP 96 held in conjunction with ALP and SAS in Aachen Germany in September 1996 The 30 revised full papers presented in the volume were selected from a total of 97 submissions also included are one invited contribution by Lambert Meerlens and five posters and demonstrations The papers are organized in topical sections on typing and structuring systems program analysis program transformation implementation issues concurrent and parallel programming tools and programming environments lambda calculus and rewriting constraints and deductive database languages Object-Based Models and Languages for Concurrent Systems Paolo Ciancarini, Oscar Nierstrasz, Akinori Yonezawa, 1995-06-20 This volume presents carefully refereed versions of the best papers presented at the Workshop on Models and Languages for Coordination of Parallelism and Distribution held during ECOOP 94 in Bologna Italy in July 1994 Recently a new class of models and languages for distributed and parallel programming has evolved all these models share a few basic concepts simple features for data description and a small number of mechanisms for coordinating the work of agents in a distributed setting This volume demonstrates that integrating such features with those known from concurrent object oriented programming is very

promising with regard to language support for distribution and software composition      **20 Years of the ACM SIGPLAN Conference on Programming Language Design and Implementation** Kathryn S. McKinley,2004 Special volume of 50 selected papers with retrospectives from the original authors      **Advanced Parallel Processing Technologies** Chenggang Wu,Albert Cohen,2013-11-26 This book constitutes the refereed post proceedings of the 10th International Symposium on Advanced Parallel Processing Technologies APPT 2013 held in Stockholm Sweden in August 2013 The 30 revised full papers presented were carefully reviewed and selected from 62 submissions The papers cover a wide range of topics capturing some of the state of the art and practice in parallel architecture parallel software concurrent and distributed systems and cloud computing with a highlight on computing systems for big data applications      **Design and Implementation of Programming Languages** J.
