Until now there has been no state of the art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. With the rapid growth of the World Wide Web and electronic information services, information is becoming available on line at an incredible rate. One result is the oft-decried information overload. No one has time to read everything yet we often have to make critical decisions based on what we are able to assimilate. The technology of automatic text summarization is becoming indispensable for dealing with this problem. Text summarization is the process of distilling the most important information from a source to produce an abridged version for a particular user or task. Until now there has been no state of the art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. The book is organized into six sections: Classical Approaches, Corpus Based Approaches, Exploiting Discourse Structure, Knowledge Rich Approaches, Evaluation Methods, and New Summarization Problem Areas. Contributors: D. A. Adams, C. Aone, R. Barzilay, E. Bloedorn, B. Boguraev, R. Brandow, C. Buckley, F. Chen, M. J. Chrzanowski, H. P. Edmundson, M. Elhadad, T. Firmin, R. P. Futrelle, J. Gortalsky, U. Concise Encyclopedia of Semantics Keith Allan, 2010-04-06

Concise Encyclopedia of Semantics is a comprehensive new reference work aiming to systematically describe all aspects of the study of meaning in language. It synthesizes in one volume the latest scholarly positions on the construction, interpretation, clarification, obscurity, illustration, amplification, simplification, negotiation, contradiction, contraction, and paraphrasing of meaning, and the various concepts, analyses, methodologies, and technologies that underpin their study. It examines not only semantics but the impact of semantic study on related fields such as morphology, syntax, and typologically oriented studies such as grammatical semantics, where semantics has made a considerable contribution to our understanding of verbal categories like tense or aspect, nominal categories like case or possession, clausal categories like causatives, comparatives or conditionals, and discourse phenomena like reference and anaphora. COSE also examines lexical semantics and its relation to syntax, pragmatics, and cognitive linguistics, and the study of how logical semantics develops and thrives often in interaction with computational linguistics. As a derivative volume from *Encyclopedia of Language and Linguistics*, Second Edition, it comprises contributions from 150 of the foremost scholars of semantics in their various specializations and draws on 20 years of development in the parent work in a compact and affordable format. Principally intended for tertiary

level inquiry and research this will be invaluable as a reference work for undergraduate and postgraduate students as well as academics inquiring into the study of meaning and meaning relations within languages As semantics is a centrally important and inherently cross cutting area within linguistics it will therefore be relevant not just for semantics specialists but for most linguistic audiences The first encyclopedia ever published in this fascinating and diverse field Combines the talents of the world s leading semantics specialists The latest trends in the field authoritatively reviewed and interpreted in context of related disciplines Drawn from the richest most authoritative comprehensive and internationally acclaimed reference resource in the linguistics area Compact and affordable single volume reference format *Advances in Computational Collective Intelligence* Ngoc Thanh Nguyen,János Botzheim,László Gulyás,Manuel Nunez,Jan Treur,Gottfried Vossen,Adrianna Kozierekiewicz,2023-09-21 This book constitutes the refereed proceedings of the 15th International Conference on Advances in Computational Collective Intelligence ICCCI 2023 held in Budapest Hungary during September 27 29 2023 The 59 full papers included in this book were carefully reviewed and selected from 218 submissions They were organized in topical sections as follows Collective Intelligence and Collective Decision Making Deep Learning Techniques Natural Language Processing Data Mining and Machine learning Social Networks and Speech Communication Cybersecurity and Internet of Things Cooperative Strategies for Decision Making and Optimization Digital Content Understanding and Application for Industry 4 0 and Computational Intelligence in Medical Applications **Advances in Artificial Intelligence** Canadian Society for Computational Studies of Intelligence.
