Olaf Dammann,2025-03-27 This book offers a comprehensive account of how uncertainty is tackled in medicine and the health sciences Olaf Dammann explores recent accounts of medicine as ineffective and suggests that the impression that medicine does not achieve its goal is at least in part due to the aleatoric natural uncertainty of biomedical processes and the subsequent epistemic cognitive uncertainty of those who desire solid information about such processes Dammann shows how concepts like inference explanation and causometry help mitigate this disconnect He points toward the possibility that some of the statistically rigid and formalized approaches such as the randomized controlled trial as the gold standard for the justification of medical interventions might better be replaced by approaches that emphasize the coherence of evidence and the people s needs for helpful health interventions auxiliarianism *Walker Remodelled* John Walker,1871
