

Chapter 5 Infection Control: Principles and Practices

Why study infection control: principles and practices?

1. Determine your own role in helping to control nursing infection control.

(i.e. understand how nursing infection control is achieved in order to deliver a safe, person-centred health care service. It is to help identify and a responsibility for areas that create infection and legal breaches, and to ensure that infection control is not seen as a separate, isolated area, but integrated into overall practice.)

Meet the Current Regulations for Health and Safety

1. In regard to regulating the practice of microbiology, what is the difference between those of agencies and state agencies?

Agency: government provides for regulation of health care and the agencies (microbiology) control those who are a resulting of this system.

2. What does OSHA require? (Occupational Safety and Health Administration)

OSHA is an executive part of the U.S. Department of Labor (DOL).

OSHA's activities are very limited to ensure the safety and health of the workers.

3. Refer to the concept of the Patient's Communication-Model (PCM)?

Communication model is the communication model between patients and the health care professionals, including communication processes.

4. Explain why you think OSHA's standards are highly better progressively as a microbiologist.

OSHA's standards include issues relating to training, testing, working, and laboratory of conditions, issues in safety in the work environment and other things. OSHA's standards include very practical, reasonable, rigorous, comprehensive and standards that are based on scientific research.
