**China's Economic Transition, 1978-2000 -- an Alternative Institutional Analysis** Stanley Zhao-xiong Yang, 2002

After Piketty Heather Boushey, J. Bradford DeLong, Marshall Steinbaum, 2017-05-08 Are Thomas Piketty's analyses of inequality on target? Where should researchers go from here in exploring the ideas he pushed to the forefront of global conversation? In After Piketty, a cast of economists and other social scientists tackle these questions in dialogue with Piketty in what is sure to be a much debated book in its own right.

Global Trends and Transitions in Security Expertise James McGann, 2017-11-08 The scope of Security and International Affairs research has expanded tremendously since the end of the Cold War to include topics beyond the realm of war studies or military statecraft. The field once devoted solely to the study of conventional military and nuclear security issues has diversified to include foci often considered nontraditional including peace and conflict, political, economic, environmental, and human security. In this exciting new volume, McGann has undertaken a quantitative and qualitative study of SIA think tanks looking at global and regional trends in their research. He argues that the end of the Cold War marked a fundamental shift within the field of defense and security studies among think tanks and academics. Tracking the evolution of security as understood by researchers and policymakers is vital as the world follows the path of the Four Mores: more issues, more actors, more competition, and more conflict. As we move forward into a world of rapid change and ubiquitous uncertainty, think tanks will only become more prominent and influential. The volume concludes with an assessment of the future of Security and International Affairs studies and raises the possibility of a return to a traditional security focus driven by recent events in Europe and the Middle East. This will be an important resource for students and scholars of security studies, global governance, and think tanks.

**Transition** Geoff Desa, Xiangping Jia, 2022-11-09 This book uses a historical and modern lens to reimagine the role that Extension could potentially play in catalyzing reciprocal co-learning relationships between Land Grant Universities and their diverse local constituencies. The establishment of statewide extension systems was once seen as a way to ensure that Land Grant Universities would be accessible and responsive to all of a state's residents. Extension systems continue to offer a front door to a major public university in almost every county of the United States, but they tend to be viewed primarily as a way to translate science or distribute information from the university to the public. This book argues for the importance of Extension and shows that we are conceiving of this system too narrowly. Only by retelling the stories of the Extension and getting people to see themselves as part of the story can we imagine a different future in which state universities and land grant colleges engage more authentically and equitably in two-way relationships with their local constituents in catalyzing reciprocal co-learning relationships between Land Grant Universities and their diverse local constituencies.

Esfahani, G. Hewings, Giovanni Facchini, 2016-05-23 This book addresses a diverse set of challenges facing Latin American economies These range from the role of neo liberal policies deficit targeting import substitution role of institutions trade and regional development and human capital and poverty *Globalization and the World of Large Cities* Fu-chen Lo, Yue-man Yeung, 1998 In this volume the world's urban future is analyzed through a number of critical themes that relate to globalization such as urban corridors Islamic cities new technologies transport and telecommunications financial centers and food issues World cities are discussed not simply for the functions they perform in the global economy but also to examine the processes by which they came to perform those functions The book builds upon a series of regional research projects focused on mega cities sponsored by the United Nations University Rich in theoretical and policy perspectives it is balanced by cross regional and cultural empirical analyses data and illustrations Its conclusions will be helpful to scholars and planners in developed and developing nations *Will the gig economy prevail?* Colin Crouch, 2019-06-07 Increasingly employees are being falsely treated as self employed This phenomenon the gig economy is seen as the inevitable shape of things to come In this book Colin Crouch takes a step back and questions this logic He shows how the idea of an employee a stable status that involves a bundle of rights has maintained a curious persistence Examining the ways companies are attacking these rights from proffering temporary work to involuntary part time work to gigging he reveals the paradoxes of the situation and argues that it should not and cannot continue He goes on to propose reforms to reverse the perverse incentives that reward irresponsible employers and punish good ones setting out an agenda for a realistic future of secure work Crouch's penetrating analysis will be of interest to everyone interested in the future of work the welfare state and the gig economy Gender and Work in Transition Regina Becker-Schmidt, 2002-01-31 World wide economic political and cultural changes transform labor markets frames of divisions of work labor organization and family structures This can be demonstrated in a specific way in Western Middle and Eastern Europe where globalization and forced technology development from the one side cross with transformations processes in forms of government from the other side Our investigation within this context emphasizes the question how the living conditions of working women in comparison with those of men are touched by these social overturns The findings presented in this volume throw light on the ambiguities which political transformation and economic globalization effect on women's work Women profit by the emergence of working places that are brought force by new market activities But at the same time many of them lose qualified occupations by shifting from full time to part time jobs from high paid sectors to low remunerated industries In all countries we find gender based income differences The proportion of women in political organizations is everywhere lower than that of men

The growing time pressure in the employment system reinforces women's strain to combine household duties child raising and paid work

Going beyond Europe we have to recognize the widening gap between industrialized regions and developing countries

**Beyond Transition**, 2005

**The Globalization of Capitalism in Third World Countries** Priyatosh Maitra, 1996 The transformation and growth of capitalism in third world countries is examined by first looking at the beginnings and growth of capitalism in the developed industrialized world and at the various stages in which it is transplanted to less developed countries This transplanted capitalism brings about only the rapid growth of capital sector and not the complete capitalist transformation of a country An interesting challenge of traditional views is made on population growth demographic transitions and technological transfers in economic development Social welfare and economic planning are justified as inevitable conditions for the present phase of the spread of capitalism
