

Algebra 2B - Activity 10.2

1. Based on the grid below, identify each function below as being a linear or a non-linear function.

2. Identify each of the functions below that are **linear**. If they are linear, write the equation of the function in slope-intercept form. If they are not linear, explain why by looking at the function's graph.

It is not linear because it does not go in the same direction.

3. Graph each of the functions part 2 on the grid below using the grid lines. Be sure to label the x and y axes. If a function is not linear, explain why.

Remember, the functions that are **linear** are those whose graphs are straight lines. If the graph is not a straight line, then the function is not linear.
