 Exclusively available on IvyPanda

## Introduction

**Developmental psychology** is a significant study of human development, including cognitive, physical, perceptual, intellectual, social, emotional growth, and personality. Moreover, **psychosocial development** is based on a person's individual needs, followed by social needs. Psychosocial development encompasses all of life, from the moment of birth until death. A second Case study is about a 26-year-old lady having **violence, anger & depression**.

**Case study 1** background: David has just completed his graduation and is on the verge of making his prospects. However, due to familial issues and peer pressure, he engaged himself in aspects of **substance abuse** and **depression**. David had a troubled childhood due to occasional fights and conflicting issues among his parents that later in his life provoked him to engage in excessive alcohol consumption, drugs, cigarettes, and immoral activities. Obviously, he had been a victim & has witnessed his mother getting victimized by his father's physical abuse, including kicking, hitting, and locking
