General comments

The first 30 questions were simple completion items; **Questions 31 to 40** were three-statement multiple completion items.

Comments on specific questions

Only five questions had statistics outside of the design limits.

Question 2 had a facility just above the design limit, indicating that candidates have a good grasp of the principles of establishing a pattern of occupancy of orbitals. Two questions had a low facility. **Question 32** was based on the kinetic theory of an ideal gas, and perhaps the statements within it, which candidates were asked to state whether they were true or not, were too penetrating: only 13% (key **A**) realized that all three statements were true, whereas 38% chose **B** and 34% **C**, believing one of the statements to be untrue. It may be that candidates have not appreciated the assumptions made within the kinetic theory with sufficient clarity. **Question 34** also had a slightly low facility, and did not discriminate well between the more able and less able candidates: 66% chose the distractor **D**, unaware that the presence of a catalyst can cause a
