Mastering Photographic Composition Creativity And Personal Style:

Mastering Photographic Composition, Creativity, and Personal Style Alain Briot,2009 Following his successful first book *Mastering Landscape Photography* Briot goes beyond the conventional rules of composition and takes on a fresh new approach to teaching the art of photography *Mastering Photographic Composition, Creativity, and Personal Style* Alain Briot,2010-12-14 Alain Briot states that The personality of the photographer must be present in the image for an artistic photograph to have value And in this book he sets out to teach the things that are essential in achieving this goal Following his successful first book *Mastering Landscape Photography* Briot goes beyond the conventional rules of composition and takes on a fresh new approach to teaching the art of photography Based upon his personal experiences as an artist teacher and photographer he opens new doors to the reader doors leading to new ways of seeing and composing images Briot approaches fine art photography as being a combination of art and technique In this new book he addresses both of these by presenting artistic and technical information On the artistic side Briot introduces artistic concepts that have been rarely if ever associated with photography On the technical side he presents numerous tools that can help you learn how to create better photographs and provides technical solutions to common photographic problems The author practices photography as a fine art What matters most to him is how photography can be used to express feelings and emotions For Briot a good photograph must be both artistically inspired and technically excellent To have just one of these two elements is not enough for a fine art photograph to be successful Topics include How to compose with color with black and white and with light Why you need to consider your audience while composing a photograph Recreate the emotions you felt when you captured your photographs How the elements of color hue contrast and saturation work in your images How to control the elements that have a visual effect in your photographs How to draw upon your personal way of seeing and then share your vision How to diagnose image maladies and apply the proper remedies How to define a color palette for a specific photograph How to use compositional elements to develop a personal style Forweword by Tony Sweet **National Geographic Complete Photography** National Geographic,2011 Discusses the digital photography process including how to use a digital camera lighting the use of space framing when to use a flash background and foreground and lenses and provides suggestions for capturing specific subjects including kids wildlife sports and landscapes **Wonderpedia / NeoPopRealism Archive 2009** Nadia Russ,2015-08-07 Wonderpedia an encyclopedia NeoPopRealism Journal of books published after year 2000 Founded by Nadia Russ in 2008 [Park Ranger's Guide to Nature & Wildlife Photography](#) Douglass Owen,2018-12-15 Douglass Owen shares his expertise as a nature photographer teacher and ranger for the National Park Service In his nearly twenty years as a park ranger Craters of the Moon National Monument and Preserve in Idaho Doug taught countless park visitors how boosting their skills as naturalists could improve their results as photographers In this guide readers everywhere can take advantage of the same training and master the field craft that enables top photographers to great wildlife shots even with
