MATH 1020 Final Exam Review
Chapter 3

Note: This review set should not be considered inclusive or exclusive of questions/material chosen for your upcoming test. It is simply extra problems to help you review the curriculum with some "new" problems that you have not seen in the lecture or learning activities.

The course objective list is inclusive of the objectives that will be chosen for your upcoming test.

1. Review your Test 3 taken this semester. Access the questions, your answers, and the correct answers through the Canvas gradebook. Review all the questions – not just the questions you had incorrect.
   Note: Be sure to realize that 1.6 was tested on Test 2.

2. Review the Test 3 review: CC MATH 1020 Unit 3 Review 3.1–3.6, 4.1–4.4
   The course objectives are listed in this review document (and will not be restated here.)

Please note questions on the final exam will be randomized. But these review problems are roughly in objective order to help you do a logical orderly review.

3. Dairy company managers have found that their weekly costs are $c(x) = 50 + 1.03^x$ dollars to produce x units of dairy products. What are the output units for the rate-of-change in weekly costs?

   a. dollars   b. units per dollar   (c.) dollars per unit   d. units

4. The number of consumer complaints to the US Dept. of Transportation about baggage handling on US airlines between 1989 and 2000 is modeled by
   $B(x) = 55.2x^2 - 524.1x + 1769$ complaints where x is the number of years after 1989.

   Write a completely defined model for the rate-of-change in consumer complaints to the US Dept. of Transportation about baggage handling on US airlines between 1989 and 2000.

   $B'(x) = 110.4x - 524.1$ complaints per year gives the rate of change in the number of complaints to the U.S. Dept. of Transportation between 1989 and 2000, where x is the number of years after 1989.

5. Give the derivative of $g(x) = e^3 - \frac{x^3}{9}$.

   a. $3e^2 - \frac{1}{3}x^2$ b. $e^3 - \frac{1}{3}x^2$ c. $e^3 - 3(\ln 9)x^2$ (d.) $-\frac{1}{3}x^2$

6. If $k(x) = 3\sqrt{x^5}$, then $k'(x) = $ _____.

   a. $3x^{\frac{5}{2}}$ b. $3\sqrt{5x^4}$ c. $\frac{6}{5}x^{\frac{-3}{5}}$ (d.) $\frac{15}{2}x^{\frac{3}{2}}$
