Kaufmann, Martin Markl, Alexander A. Voronov, 2024-07-03 This volume contains the proceedings of the AMS Special Session on Higher Structures in Topology Geometry and Physics held virtually on March 26-27, 2022. The articles give a snapshot survey of the current topics surrounding the mathematical formulation of field theories. There is an intricate interplay between geometry, topology, and algebra which captures these theories. The hallmark are higher structures which one can consider as the secondary algebraic or geometric background on which the theories are formulated. The higher structures considered in the volume are generalizations of operads, models for conformal field theories, string topology, open/closed field theories, BF/BV formalism, actions on Hochschild complexes and related complexes and their geometric and topological aspects. **U.S. Government Research & Development Reports**, 1966 U.S. Government Research & Development Reports, 1969 **Nuclear Science Abstracts**, 1960 **Scientific and Technical Aerospace Reports**, 1963-04 Current Index to Journals in Education, 1989 **Applied Mechanics Reviews**, 1948 **Government Reports Announcements & Index**, 1992 Bibliography of Scientific and Industrial Reports, 1968-07 Government Reports Announcements, 1972 alternative press index ALTERNATIVE PRESS INDEX, 2002 **Japanese Technical Periodical Index**, 1986 Japanese Technical Abstracts, 1986 **Formalizing Common Sense** John McCarthy, 1990 This is a collection of papers written by John McCarthy on artificial intelligence.
