Topic: Family, Life & Experiences | Words: 1131 | Pages: 4

Introduction

A divorce is a widespread phenomenon in modern society, and the community does not condemn people when they decide to end their marriage. However, a divorce is typically considered a negative event because it brings emotional and often financial challenges to all parties. According to the official statistics, the United States witnessed 2.3 divorces per 1,000 citizens in 2020, while that figure was 3.6 in 2010 (Centers for Disease Control and Prevention, 2020). This data can make one think that the divorce rate keeps declining, but a close look at the situation can reveal that the reduced number of such cases is associated with a reducing number of marriages. In particular, there were 6.8 marriages per 1,000 citizens in 2010 and 5.1 marriages in 2020 (Centers for Disease Control and Prevention, 2020). This information reveals that divorces represent a sensitive topic in the US, and it is scientifically interesting to research how these events affect children.

According to Amato (2014), a generalized conclusion is that children with divorced parents are subject to more physical and mental health issues compared to children from complete families. The list of adverse impacts is versatile, including conduct problems, lower academic results, depression, and many other
