Spatial Databases A Tour:

   Spatial Databases ,2007 Spatial database research has continued to advance greatly since three decades ago addressing the growing data management and analysis needs of spatial applications This research has produced a taxonomy of models for space conceptual models spatial query languages and query processing spatial file organization and indexes and spatial data mining However emerging needs for spatial database systems include the handling of 3D spatial data temporal dimension with spatial data and spatial data visualization In addition the rise of new systems such as sensor networks and multi core processors is likely to have an impact in spatial databases The goal of this paper is to provide a broad overview of the recent advancements in spatial databases and research needs in each area _Encyclopedia of Database Technologies and Applications_ Rivero, Laura C.,Doorn, Jorge Horacio,Ferraggine, Viviana E.,2005-06-30 Addresses the evolution of database management technologies and applications along with the progress and endeavors of new research areas P xiii _Spatial Databases_ Philippe Rigaux,Michel Scholl,Agnès Voisard,2002 The authors explore and explain current techniques for handling the specialised data that describes geographical phenomena in a study that will be of great value to computer scientists and geographers working with spatial databases **Web and Wireless Geographical Information Systems** James D. Carswell,Stewart Fotheringham,Gavin McArdle,2009-11-30 This book constitutes the refereed proceedings of the 9th International Symposium on Web and Wirelsss Geographical Information Systems W2GIS 2009 held in Maynooth Ireland in December 2009 The 12 revised full papers presented together with two invited talks were carefully reviewed and selected from numerous submissions The papers span a wide area including but not limited from geospatial analysis and personalization and semantic geo spatial web to W2GIS case studies and web and mobile applications and prototypes **Handbook of e-Tourism** Zheng Xiang,Matthias Fuchs,Ulrike Gretzel,Wolfram Höpken,2022-09-01 This handbook provides an authoritative and truly comprehensive overview both of the diverse applications of information and communication technologies ICTs within the travel and tourism industry and of e tourism as a field of scientific inquiry that has grown and matured beyond recognition Leading experts from around the world describe cutting edge ideas and developments present key concepts and theories and discuss the full range of research methods The coverage accordingly encompasses everything from big data and analytics to psychology user behavior online marketing supply chain and operations management smart business networks policy and regulatory issues and much much more The goal is to provide an outstanding reference that summarizes and synthesizes current knowledge and establishes the theoretical and methodological foundations for further study of the role of ICTs in travel and tourism The handbook will meet the needs of researchers and students in various disciplines as well as industry professionals As with all volumes in Springer s Major Reference Works program readers will benefit from access to a continually updated online version **GeoSpatial Semantics** Frederico Fonseca,M. Andrea Rodriguez,Sergei Levashkin,2007-11-17 This book constitutes the refereed

proceedings of the Second International Conference on GeoSpatial Semantics GeoS 2007 held in Mexico City Mexico in November 2007 The papers are organized in topical sections on models and languages for geo ontologies alignment and integration of geo ontologies ontology based spatial information retrieval formal representation for geospatial data and integration of semantics into spatial query processing **Design and Implementation of Large Spatial Databases** ,1990 The most recent developments in spatial data management are reported in these proceedings SSD 89 brought together computer scientists and experts from application areas such as geography computer vision robotics computer aided manufacturing and environmental information systems This proceedings volume includes subjects such as extensible database systems spatial data structures an index structures spatial reasoning geographic information systems quadtrees and thematic map modeling Publisher s website *Journal on Data Semantics XI* Philippe Thiran,Jeff Z. Pan,Stefano Spaccapietra,Steffen Staab,Terry Halpin,Pavel Shvaiko,Vojtech Svatek,John F. Roddick,2008-12-09 The LNCS Journal on Data Semantics is devoted to the presentation of notable work that in one way or another addresses research and development on issues related to data semantics The scope of the journal ranges from theories supporting the formal definition of semantic content to innovative domain specific applications of semantic knowledge The journal addresses researchers and advanced practitioners working on the semantic web interoperability mobile information services data warehousing knowledge representation and reasoning conceptual database modeling ontologies and artificial intelligence Volume XI contains extended versions of eight revised and selected papers from several international workshops in the field which took place in 2006 GIS for Environmental Applications Xuan Zhu,2022-01-31 GIS for Environmental Applications provides a practical introduction to the principles methods techniques and tools in GIS for spatial data management analysis modelling and visualisation and their applications in environmental problem solving and decision making It covers the fundamental concepts principles and techniques in spatial data spatial data management spatial analysis and modelling spatial visualisation spatial interpolation spatial statistics and remote sensing data analysis as well as demonstrates the typical environmental applications of GIS including terrain analysis hydrological modelling land use analysis and modelling ecological modelling and ecosystem service valuation Case studies are used in the text to contextualise these subjects in the real world examples and detailed tutorials are provided in each chapter to show how the GIS techniques and tools introduced in the chapter can be implemented using ESRI ArcGIS a popular GIS software system for environmental applications and other third party extensions to ArcGIS to address The emphasis is placed on how to apply or implement the concepts and techniques of GIS through illustrative examples with step by step instructions and numerous annotated screen shots The features include Over 350 figures and tables illustrating how to apply or implement the concepts and techniques of GIS Learning objectives along with the end of chapter review questions Authoritative references at the end of each chapter GIS data files for all examples as well as PowerPoint presentations for each chapter downloadable from the companion website

GIS for Environmental Applications weaves theory and practice together assimilates the most current GIS knowledge and tools relevant to environmental research management and planning and provides step by step tutorials with practical applications This volume will be an indispensable resource for any students taking a module on GIS for the environment

Spatial Databases Philippe Rigaux,2002 **International Conference on Urban Climate, Sustainability and Urban Design** Bao-Jie He,Deo Prasad,Li Yan,Ali Cheshmehzangi,Gloria Pignatta,2024-11-11 This open access book is a proceeding of the International Conference on Urban Climate Sustainability and Urban Design in Mianyang MYUCSUD This work focuses on the latest thoughts ideas models methods solutions and practices on urban climate mitigation and adaptation through sustainable planning and design covering interdisciplinary topics in architecture urban rural planning meteorology building and construction engineering material engineering geographic sciences public health public administration computer sciences etc This book can provide students and researchers from urban planning urban design urban meteorology civil and construction engineering and urban governance with better understanding of urban climate sciences innovative ideas and tangible solutions Handbook of Research on Innovations in Database Technologies and Applications Viviana E. Ferraggine,Jorge H. Doorn,Laura C. Rivero,2009-01-01 This book provides a wide compendium of references to topics in the field of the databases systems and applications Provided by publisher **Advances in Tourism, Technology and Systems** João Vidal de Carvalho,Pedro Liberato,Alejandro Peña,2022-05-27 This book features a collection of high quality research papers presented at the International Conference on Tourism Technology Systems ICOTTS 2021 held at the University of Cartagena in Cartagena de Indias Colombia from 4 to 6 November 2021 The book is divided into two volumes and it covers the areas of technology in tourism and the tourist experience generations and technology in tourism digital marketing applied to tourism and travel mobile technologies applied to sustainable tourism information technologies in tourism digital transformation of tourism business e tourism and tourism 2 0 big data and management for travel and tourism geotagging and tourist mobility smart destinations robotics in tourism and information systems and technologies *Spatial Database Systems* Albert K.W. Yeung,G. Brent Hall,2007-05-23 The decision to write this book was motivated by a number of factors First although several useful textbooks on spatial databases have recently been published this is an area of spatial information science that has lagged somewhat behind the rapid advances of the technology and the profusion of books on domain specific applications Second much of the information pertaining to spatial database technologies is only available in scattered journal papers and conference proceedings and prior to this book no single effort has been made to sift through this expansive literature and unite the key contributions in a single volume The tasks of sourcing and coherently integrating relevant contributions is daunting for students many of whom have a substantial number of competing demands placed on them This book should make the task of knowledge building less daunting Third and perhaps most importantly an apparent trend in many spatial information science programs is to focus from first or second year undergraduate through to fourth

year courses on learning to work confidently and independently with increasingly complex software tools Hence many courses are technical in nature and while they continue to produce technically adept students knowledge of the broader aspects of spatial databases is often not as complete as it might be among graduates Some programs have sought to address this by introducing courses that focus on spatial data management However these courses are largely unsupported by a relevant and contemporary textbook **GIS World Sourcebook 1995** [Anonymus AC01149836],1994 **Spatial Data Management** Nikos Mamoulis,2022-06-01 Spatial database management deals with the storage indexing and querying of data with spatial features such as location and geometric extent Many applications require the efficient management of spatial data including Geographic Information Systems Computer Aided Design and Location Based Services The goal of this book is to provide the reader with an overview of spatial data management technology with an emphasis on indexing and search techniques It first introduces spatial data models and queries and discusses the main issues of extending a database system to support spatial data It presents indexing approaches for spatial data with a focus on the R tree Query evaluation and optimization techniques for the most popular spatial query types selections nearest neighbor search and spatial joins are portrayed for data in Euclidean spaces and spatial networks The book concludes by demonstrating the ample application of spatial data management technology on a wide range of related application domains management of spatio temporal data and high dimensional feature vectors multi criteria ranking data mining and OLAP privacy preserving data publishing and spatial keyword search Table of Contents Introduction Spatial Data Indexing Spatial Query Evaluation Spatial Networks Applications of Spatial Data Management Technology **pt.
