illustrate the ecological approach by exploring how language makes connections between subjective experiences as people construct meaning and action This book offers the reader a holistic interdisciplinary approach to the study of language as discourse questioning traditional views of disciplinary knowledge and the role of discourse in the pursuit construction and compartmentalisation of such knowledge Through the variety of disciplines experiences and approaches the contributors show how the world and word are contingent on each other The notions of connectivity contingency and change are themes that run through the book and in the interweaving of these themes readers will find persuasive illustrations of an ecological approach to applied linguistics
