Mindshift Barbara Oakley, PhD, 2017-04-18 Mindshift reveals how we can overcome stereotypes and preconceived ideas about what is possible for us to learn and become At a time when we are constantly being asked to retrain and reinvent ourselves to adapt to new technologies and changing industries this book shows us how we can uncover and develop talents we didn't realize we had no matter what our age or background We're often told to follow our passions But in Mindshift Dr Barbara Oakley shows us how we can broaden our passions Drawing on the latest neuroscientific insights Dr Oakley shepherds us past simplistic ideas of aptitude and ability which provide only a snapshot of who we are now with little consideration about how we can change Even seemingly bad traits such as a poor memory come with hidden advantages like increased creativity Profiling people

from around the world who have overcome learning limitations of all kinds Dr Oakley shows us how we can turn perceived weaknesses such as impostor syndrome and advancing age into strengths People may feel like they're at a disadvantage if they pursue a new field later in life yet those who change careers can be fertile cross-pollinators They bring valuable insights from one discipline to another Dr Oakley teaches us strategies for learning that are backed by neuroscience so that we can realize the joy and benefits of a learning lifestyle Mindshift takes us deep inside the world of how people change and grow Our biggest stumbling blocks can be our own preconceptions but with the right mental insights we can tap into hidden potential and create new opportunities

Redefining Smart Thom Markham, 2015-05-27 Equip Your Students To Create Their Own Intellectual Destiny The best teachers are the ones who can empower students to ask intelligent questions and persistently seek the answers In this book you'll find a proven detailed method for how to do this by learning A groundbreaking new approach to content delivery and instruction geared towards maximizing student discovery deep thought exploration and creativity Why educators must let go of student IQ as a concept that influences teaching methods in any way How to create a protocol driven environment that fosters deep sharing and reflection

Mindshift Dr. Marty Lerman, 2013-02-15 I'm too fat I MUST be successful I'm scared It's because when I was a kid Daddy is never home We all have frameworks we've built for ourselves throughout life Ways of being Of believing Glasses through which we see life Whether positive or negative they shape our whole being and affect our daily lives From being unsatisfied at home or in a relationship to impressions left with us from childhood we constantly live out of lives through these lenses we create in our mind In Mindshift Drs Marty Lerman and Samuel Kupper seek to take the reader on an experiential journey to show how simple changes in perception a reworking of the way we see through our own lenses can create drastic positive change Read about how one woman conquered cancer how a veteran came home and now lives without the lasting effects of war how kids no longer suffer from ADHD and more If these people can create these kinds of changes in their lives with just a simple shift of the mind imagine what you could do Your mind is powerful Harness it Shift

Hambi bleibt! How tree-sitting contributed to a national mind-shift on lignite mining Silke Oppermann, 2020-11-17. Anthology from the year 2019 in the subject Environmental Sciences, grade 1-3. The University of Applied Sciences in Eberswalde, language English, abstract. This report aims to provide a comprehensive systemic overview of the lignite and forest history in NRW, analyzing the strategies employed by tree sitters to protect the forest from clearance. Beyond the local context, the paper explores how these grassroots efforts sought to instigate a broader societal shift from a fossil fuel-based paradigm to one aligned with planetary boundaries. The urgency for change is underlined by the environmental implications of lignite combustion, recognized as one of the world's major climate challenges. The least efficient fossil fuel, lignite, poses a significant threat to biodiversity and terrestrial ecosystems, necessitating a reassessment of decisions made in the 1970s. The paper argues for a shift in focus from protecting coal mines to safeguarding the environment, echoing the sentiments of the tree sitters and civil society actors involved. By investigating the actors and stakeholders in this struggle, including the tree sitters, the environmental NGO BUND Landesverband NRW, and the energy giant RWE AG, the paper provides a nuanced understanding of the complex dynamics at play. It also explores the strategies employed, ranging from confrontational tree sitting to legal action and societal awareness campaigns. While the tree sitters primarily relied on their bodies, commitment, and local support for resources, their impact transcended the local level. The paper evaluates the outcomes of these efforts, acknowledging the success in garnering national attention and contributing to the political discourse on lignite mining and climate change in Germany. In conclusion, the Hambach Forest saga serves as a case study in environmental activism, highlighting the potential of grassroots movements to effect change. The paper contends that even in the face of temporary setbacks, the persistence and determination of tree sitters played a crucial role in shaping a national conversation on lignite mining and fostering a growing awareness of the need for systemic change towards a sustainable society.
