**SAP CRM Web Client** Michael Füchsle,Matthias E. Zierke,2009 Do you want to utilize the new CRM user interface in the best possible way This comprehensive guide suitable for SAP CRM 2007 and SAP CRM 7 0 explains everything that you need to know about the CRM Web Client the architecture of the UI framework the Customizing options roles navigation portal integration and much more as well as all options that are available for customer specific extensions through programming Readers quickly discover the critical modeling tools such as the Easy Enhancement Workbench EEWB and the UI Configuration Tool Then explore all options for adapting the header navigation and work area without any development effort The authors provide an in depth look at the individual components of views windows and controllers and deliver priceless tips on context binding model integration navigation and more You ll learn about development and extension of UI components the usage of the Business Object Layer BOL and the extension of the GenIL object model as well as the modeling and usage of web services for the integration of Office applications What s more you ll also find comprehensive real life examples to provide you with additional support for your daily project tasks **SAP Web Client** Tzanko Stefanov,Armand Sezikeye,Sanjeet Mall,2011 If you work with SAP Web Client and want to improve your development skills this is the book for you Youll find practical information about specific development tasks in the SAP Web Client platform and youll also learn the background information necessary to round out your understanding of each skill In addition you can explore detailed concrete CRM based case studies that are carried from chapter to chapter This comprehensive guide will provide invaluable instruction and insight to any developer in his day to day work with SAP Web Client A Greater Foundation for Machine Learning Engineering Dr. Ganapathi Pulipaka,2021-10-01 This research scholarly illustrated book has more than 250 illustrations The simple models of supervised machine learning with Gaussian Na ve Bayes Na ve Bayes decision trees classification rule learners linear regression logistic regression local polynomial regression regression trees model trees K nearest neighbors and support vector machines lay a more excellent foundation for statistics The author of the book Dr Ganapathi Pulipaka a top influencer of machine learning in the US has created this as a reference book for universities This book contains an incredible foundation for machine learning and engineering beyond a compact manual The author goes to extraordinary lengths to make academic machine learning and deep learning literature comprehensible to create a new body of knowledge The book aims at readership from university students enterprises data science beginners machine learning and deep learning engineers at scale for high performance computing environments A Greater Foundation of Machine Learning Engineering covers a broad range of classical linear algebra and calculus with program implementations in PyTorch TensorFlow R and Python with in depth coverage The author does not hesitate to go into math equations for each algorithm at length that usually many foundational machine learning books lack leveraging the JupyterLab environment Newcomers can leverage the book from University or people from all walks of data science or software lives to the advanced practitioners

of machine learning and deep learning Though the book title suggests machine learning there are several implementations of deep learning algorithms including deep reinforcement learning The book s mission is to help build a strong foundation for machine learning and deep learning engineers with all the algorithms processors to train and deploy into production for enterprise wide machine learning implementations This book also introduces all the concepts of natural language processing required for machine learning algorithms in Python The book covers Bayesian statistics without assuming high level mathematics or statistics experience from the readers It delivers the core concepts and implementations required with R code with open datasets The book also covers unsupervised machine learning algorithms with association rules and k means clustering metal learning algorithms bagging boosting random forests and ensemble methods The book delves into the origins of deep learning in a scholarly way covering neural networks restricted Boltzmann machines deep belief networks autoencoders deep Boltzmann machines LSTM and natural language processing techniques with deep learning algorithms and math equations It leverages the NLTK library of Python with PyTorch Python and TensorFlow s installation steps then demonstrates how to build neural networks with TensorFlow Deploying machine learning algorithms require a blend of cloud computing platforms SQL databases and NoSQL databases Any data scientist with a statistics background that looks to transition into a machine learning engineer role requires an in depth understanding of machine learning project implementations on Amazon Google or Microsoft Azure cloud computing platforms The book provides real world client projects for understanding the complete implementation of machine learning algorithms This book is a marvel that does not leave any application of machine learning and deep learning algorithms It sets a more excellent foundation for newcomers and expands the horizons for experienced deep learning practitioners It is almost inevitable that there will be a series of more advanced algorithms follow up books from the author in some shape or form after setting such a perfect foundation for machine learning engineering *Soft Computing Applications* Valentina Emilia Balas,Janos Fodor,Annamária R. Várkonyi-Kóczy,Joszef Dombi,Lakhmi C Jain,2012-10-31 This volume contains the Proceedings of the 5thInternational Workshop on Soft Computing Applications SOFA 2012 The book covers a broad spectrum of soft computing techniques theoretical and practical applications employing knowledge and intelligence to find solutions for world industrial economic and medical problems The combination of such intelligent systems tools and a large number of applications introduce a need for a synergy of scientific and technological disciplines in order to show the great potential of Soft Computing in all domains The conference papers included in these proceedings published post conference were grouped into the following area of research Soft Computing and Fusion Algorithms in Biometrics Fuzzy Theory Control andApplications Modelling and Control Applications Steps towards Intelligent Circuits Knowledge Based Technologies for Web Applications Cloud Computing and Security Algorithms Computational Intelligence for Biomedical Applications Neural Networks and Applications Intelligent Systems for Image Processing Knowledge Management for Business Process and Enterprise Modelling The combination of

intelligent systems tools and a large number of applications introduce a need for a synergy of scientific and technological disciplines in order to show the great potential of Soft Computing in all domains **Customer Relationship Management, 2e** Mallika Srivastava | Ankur Khare, Customer Relationship Management is no longer a function it is a philosophy In a world driven by experiences relationships are the true currency of business As organizations evolve so must their commitment to understanding engaging and growing with their customers Hence from conceptual frameworks to digital transformation this book will take the audiences on a journey through the strategic world of CRM *First Steps in ABAP* Dr. Boris Rubarth, A lot of SAP professionals start their careers as programmers and focus on turning functional specifications into technical specifications and writing code First Steps in SAP ABAP Advanced Business Application Programming is the resource that every beginner needs to have You will learn how to write your own ABAP code step by step and progressively build your own ABAP application Step by Step instructions for beginners Comprehensive descriptions and code examples A guide to create your first ABAP application Tutorials that provide answers to the most commonly asked programming questions Get a head start on SAP ABAP This book provides you with the tools you need to get started with a job as an SAP ABAP programmer
